

Infection Control

The meal/snack tables must be cleaned appropriately with the correct cleaning products, these cleaning products must contain the following BS numbers;

- BSEN1276:1997
- BSEN13697:2001

The products are always changing so please check for up to date guidance. Further information on what products can be used and meet appropriate standards can be found at <http://www.disinfectant-info.co.uk/>

All tables must be cleaned using disinfectant spray and blue paper. The first spray and wipe cleans the table, wait for ten seconds and then spray and wipe again to disinfect the table.

Please see attached Infection Control Sample Policy taken from Setting the Table (NHS Health Scotland, 2018) <http://www.healthscotland.com/uploads/documents/30341-Setting%20the%20Table.pdf>
