Numeracy and Mathematics Progression Framework – Version 2

Produced: September 2017

Due for Review: September 2018

Owner: Pauline Inglis/Maria McArthur

Introduction

I am pleased to be able to provide all staff in Argyll and Bute with a final version of the Numeracy and Mathematics Progression Framework.

This framework has been designed by triangulating the information from the National Numeracy and Mathematics Progression Framework, the Experiences and Outcomes from Curriculum for Excellence and the **final** Benchmarks for Numeracy and Mathematics.

The Numeracy Forum has been consulted and staff across the council have also been asked to provide their views on the Draft Numeracy and Mathematics Progression Framework which was sent out to all schools in January 2017.

To bring this Framework in line with the final Benchmarks, some small changes have been made throughout. In addition, we hope that the refreshed layout provides clarity for all practitioners and shows the clear progression of skills required from Early level to Fourth level.

The purpose of this document is to offer a continuum of learning through to the end of the Broad General Education. This framework is designed to enhance assessment and moderation; provide staff with a framework to promote progression in learning and teaching; and enable the sharing of standards within schools, across school clusters and across the Authority.

I hope that the content of the progression supports your teaching of Numeracy and Mathematics.

Maria McArthur

Principal Teacher for Numeracy

Numeracy and Mathematical skills

Numeracy and Mathematical skills are embedded in the Experiences and Outcomes and cannot be taught in isolation. These skills can be developed through careful planning of learning activities, questions and a range of assessments. Suggestions on activities that can be used with pupils are available to view on Sharing Argyll Learning Ideas - <https://blogs.glowscotland.org.uk/ab/sali/2016/12/20/numeracy-home/>

The tasks should encourage learners to think about the concepts, going beyond the recall of knowledge and encouraging them to explain their thinking. As learners progress through Curriculum for Excellence levels, they should demonstrate increasing sophistication and independence in their ability to demonstrate, link, transfer and apply the following skills in a range of increasingly more challenging contexts:

- interpret questions;
- select and communicate processes and solutions;
- justify choice of strategy used;
- link mathematical concepts;
- use mathematical vocabulary and notation;
- use mental agility;
- reason algebraically; and
- determine the reasonableness of a solution.

The table below provides a brief outline of the key features of each skill.

These skills are intrinsic in the effective teaching of Numeracy and Mathematics.

The table below provides the rationale for each skill and some guidance on how to support learners with their development.

Numeracy and mathematical skills	
Interpret questions	<p>Learners need to interpret questions successfully in order to work out solutions. This involves selecting the relevant information and identifying redundant or missing information in a question. Interpretation of a question can also include interpreting data where learners need to understand information presented to be able to work out the solution. Learners can be supported to develop their skills of interpreting questions by highlighting key words or phrases, taking notes or drawing diagrams. These strategies will help learners to make important decisions about which operation to choose when solving a word problem. The sophistication of question and the knowledge base needed to solve the problem will increase as children progress in their learning.</p>
Select and communicate processes and solutions	<p>To demonstrate understanding, learners need to be able to explain why they have chosen a particular process as it demonstrates their understanding of the task, question or assessment. Learners need frequent opportunities to discuss their thinking with their peers and teachers. They need to select from a range of processes and as they progress in their learning, they should increasingly choose processes which are most efficient. Learners should also be able to discuss their solutions to verbalise their thought process, either through explaining their thinking, or demonstrating it pictorially. As learners progress through the increased challenges of the levels, they will become more confident in their abilities to select from a growing repertoire of strategies, articulate their chosen approaches with increasing clarity and make greater use of specialised vocabulary.</p>

Justify choice of strategy used	<p>Asking learners to justify their choice of strategy provides a valuable opportunity for them to ‘talk through’ their thinking and explain why they adopted the chosen approach. By sharing their thinking with others, the learner will be able to better understand their own strategies, learn from others and identify the most efficient strategies for different types of tasks. This process also provides evidence to support teachers’ assessment of the learner’s understanding. In developing this skill in learners, teachers should regularly ask the question, ‘Why did you choose that strategy?’ and ask learners to show their working. Asking learners to justify their strategy will ensure that they have not arrived at the right answer for the wrong reason. As learners progress through the levels, they will become increasingly reflective and draw on experiences which ensure greater confidence in their ability to justify their choice of strategy, comparing it to others which may have been used.</p>
Link mathematical concepts	<p>As they develop more sophisticated understanding across the range of learning in numeracy and mathematics, learners need to be able to link mathematical concepts to solve problems. Learners should be supported to see that their learning in one area can be transferred to another. For example, learning about scale can be used when reading measurements or creating graphs. It is essential that when staff are planning for learning, they consider how mathematical concepts are connected and make this explicit to learners. As learners progress through the levels and concepts become embedded, they will, more independently, identify an increasing number of connections across aspects of mathematics in both prior and current learning and use these links intuitively to solve problems.</p>
Use mathematical vocabulary and notation	<p>Encouraging the consistent use of correct mathematical language from early level onwards provides learners with a common vocabulary and a shared understanding. As learners develop understanding of new concepts, teachers should ensure that the correct terminology and notation are used. As learners progress through the levels, they will develop an extended and more specialised range of vocabulary and notation and use these appropriately in more complex situations.</p>

Mental agility	Mental agility is an essential life skill which must be developed from the early stages. In all learning in numeracy and mathematics, lack of fluency in mental processes can be a significant barrier to progress. Learners who, from an early level, develop a sound knowledge of key number bonds and an understanding of the number families will be more able to calculate mentally using a range of strategies. As learners progress through the levels, they will become increasingly skilled in manipulating a wider range of numbers and can choose from a range of strategies to mentally solve more open-ended, multi-step problems in a range of real life contexts.
Reason algebraically	Understanding that numbers can be replaced by pictures or symbols is fundamental to all algebraic reasoning. Using pictures and symbols is an early step in understanding variables and constants and introduces the concept of finding the unknown quantity. This takes learners beyond the immediate, single numerical problem to working with similar problems which can be solved algebraically. An early focus on algebraic reasoning provides a stronger basis for later, formal learning in algebra. As learners progress they will build their understanding of commutative, associative and distributive laws and use these, along with a sound knowledge of number, patterns and relationships to work confidently with expressions and equations.
Determine the reasonableness of a solution	The development of early estimation skills lays the foundation for more refined comparisons and for approximations to be made as learners make progress. Learners should use rounding skills routinely to estimate and check the reasonableness of a solution. This will include being able to select the most appropriate degree of accuracy for the task. As learners progress they will use skills of estimation and rounding routinely when working with a large range of numbers in real-life contexts. After calculating, they will, with increasing confidence, independently use the estimate to verify the reasonableness of the solution, justifying their approach.

Curriculum Organiser	Numeracy: Estimation and Rounding				
	Awareness of size and amount	Concept of estimation	Concept of rounding	Accuracy within rounding	Tolerance
EARLY LEVEL	estimate, nearly, roughly, close to, about the same as, just over, just under, too many, too few, enough, not enough	FIRST LEVEL	exact, exactly, round, nearest, round to nearest 10	SECOND LEVEL	approximate, approximately, round to the nearest hundred, round to the nearest thousand, round to the nearest tenth, one decimal place, round to the nearest hundredth, two decimal places
THIRD LEVEL	round to the nearest thousandth, three decimal places	FOURTH LEVEL	tolerance, round to significant figures

Milestone/s	Concept of Rounding; Accuracy within Rounding		
SECOND LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can use my knowledge of rounding to routinely estimate the answer to a problem then, after calculating, decide if my answer is reasonable, sharing my solution with others.</p> <p>MNU 2-01a</p>		
Progression Through Second Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level	
<ul style="list-style-type: none"> I can round to the nearest thousand. I can round 3 digit whole numbers to nearest ten. I can round 3 digit whole numbers to nearest hundred. I can use rounding skills to estimate. I can use rounding skills to check answers. I can use knowledge of estimation and rounding within a range of problem solving contexts including money or measure. 	<ul style="list-style-type: none"> I can round to the nearest tens of thousands. I can round 4 digit whole numbers to the nearest thousand, hundred and ten. I can round decimal numbers to the nearest whole number. I can round numbers to 1 and 2 decimal places using a number line. I can use rounding skills to estimate. I can use rounding skills to check answers. I can use knowledge of estimation and rounding within a range of problem solving contexts including money or measure. 	<ul style="list-style-type: none"> I can round to the nearest hundreds of thousands. I can round decimals up to at least 2 decimal places. I can round numbers larger than 4 digits and use in calculations to estimate answers then check against accurate calculations. I can use knowledge of estimation and rounding within a range of problem solving contexts including money or measure. I can show my understanding the rule for rounding involving half way between, for example 0·5 and above is rounded up, below 0·5 is rounded down. 	<ul style="list-style-type: none"> Rounds whole numbers to the nearest 1000, 10,000 and 100,000. Rounds decimal fractions to the nearest whole number, to one decimal place and to two decimal places. Applies knowledge of rounding to give an estimate to a calculation appropriate to the context, and uses it to check the reasonableness of the solution.

Curriculum Organiser	Number, Money and Measure – Estimation and Rounding		
Milestone/s	Accuracy within Rounding		
THIRD LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can round a number using an appropriate degree of accuracy, having taken into account the context of the problem. MNU 3-01a</p>		
Progression Through Third Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level	
<ul style="list-style-type: none"> • I can round numbers to 3 decimal places. • I can use my knowledge of estimation to solve problems. • I can show my knowledge of estimation to explain my choice of strategy. 		<ul style="list-style-type: none"> • I can apply my knowledge of rounding to solve problems. • I use the context of the problem to decide on a suitable degree of accuracy. 	

Curriculum Organiser	Number, Money and Measure – Estimation and Rounding	
Milestone/s	Tolerance	
FOURTH LEVEL		
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>Having investigated the practical impact of inaccuracy and error, I can use my knowledge of tolerance when choosing the required degree of accuracy to make real-life calculations.</p> <p>MNU 4-01a</p>	
Progression Through Fourth Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> • I know and can show my understanding of what a significant figure is. I can round a number to any number of significant figures. • I know how many significant figures a number has. • I can round a number to 1 significant figure. • I can analyse a problem and choose an appropriate degree of accuracy for rounding. • I know that in a multi-step calculation, rounding numbers inappropriately in a calculation will lead to an inaccurate answer. • I know that in a multi-step calculation, I need to round beyond the degree of accuracy throughout, before rounding the final answer to the required degree of accuracy. • I know what is meant by tolerance. • I can write tolerances in the form $200\text{cm} \pm 2\text{cm}$ or $(200 \pm 2)\text{cm}$ • I can interpret tolerances. 		<ul style="list-style-type: none"> • Rounds answers to a specified significant figure. • Demonstrates that the context of the question needs to be considered when rounding. • Demonstrates the impact of inaccuracy and error, for example, the impact of rounding an answer before the final step in a multi-step calculation. • Uses a given tolerance to decide if there is an allowable amount of variation of a specified quantity, for example, dimensions of a machine part, $235\text{mm} \pm 1\text{mm}$.

Milestone/s	Counting; Quantity; Mental Agility; Place Value; Addition and Subtraction; Multiplication and Division		
FIRST LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I have investigated how whole numbers are constructed, can understand the importance of zero within the system and can use my knowledge to explain the link between a digit, its place and its value. MNU 1-02a</p> <p>I can use addition, subtraction, multiplication and division when solving problems, making best use of the mental strategies and written skills I have developed. MNU 1-03a</p>		
Progression Through First Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level	
<ul style="list-style-type: none"> • I know the forward number sequence to 100. • I know the backward number sequence from 100 to 0. • I can read and write numbers to 100 in numerals. • I can order consecutive numbers within 100. • I can use < and > to compare two numbers within 100. • I can find missing numbers on a number line or square up to 100. • I can say how many tens there are in a two digit number, for example six 10s in 67. • I can say how many ones there are in a two digit number. • I can partition a two digit number and say what each digit represents, for example 67 is 60 and 7. • I can use place value materials to show that I understand the value of the digits in two digit numbers, for example Dienes, Numicon, Tens Frames, Place Value Arrows. 	<ul style="list-style-type: none"> • I know the forward number sequence to 1000. • I know the backward number sequence from 1000 to 0. • I can read and write numbers to 1000 in numerals. • I can order non-consecutive numbers within 100 (smallest to biggest and biggest to smallest). • I understand zero as a placeholder in whole numbers to at least 100. • I can use place value materials to show that I understand the value of the digits in three digit numbers, for example Dienes, Place Value Arrows. 	<ul style="list-style-type: none"> • I can order consecutive numbers within 1000 (smallest to biggest and biggest to smallest). • I can use < and > to compare two numbers within 1000. • I can find missing numbers in part of a number line or square up to 1000. • I can order non-consecutive numbers within 1000 (smallest to biggest and biggest to smallest). • I understand zero as a placeholder in whole numbers to at least 1000. • I can partition a three digit number into thousands, hundreds, tens and ones, identifying the value of each digit. 	<ul style="list-style-type: none"> • Reads, writes, orders and recites whole numbers up to 1000, starting from any number in the sequence. • Demonstrates understanding of zero as a placeholder in whole numbers to 1000. • Identifies the value of each digit in a whole number with up to at least 3 digits, for example $867 = 800 + 60 + 7$.

Progression Through First Level	Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> I know what the four operations are and can use the correct mathematical vocabulary to discuss them. I can skip count in 2s (FNWS/BNWS). I can skip count in 5s (FNWS/BNWS). I can skip count in 10s (FNWS/BNWS). I can skip count in 100s (FNWS/BNWS). I can count forward and backwards in 2s, 5s, 10s and 100s from any given number. <ul style="list-style-type: none"> I understand that the order in which I add numbers does not matter, for example I understand that $2 + 6$ is the same as $6 + 2$. I can use my understanding of the commutative law to solve addition problems more efficiently, for example to count on from the bigger number. <ul style="list-style-type: none"> I can identify the whole amount and the parts within addition and subtraction sums and write 'number sentences'. 	<p style="text-align: center;">← →</p> <ul style="list-style-type: none"> Uses correct mathematical vocabulary when discussing the four operations, including, subtract, add, sum of, total, multiply, product, divide and shared equally. Counts forwards and backwards in 2s, 5s, 10s and 100s <ul style="list-style-type: none"> Demonstrates understanding of the commutative law, for example, $6 + 3$, $3 + 6$, 2×4, 4×2.

Progression Through First Level	Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> I can partition single digit numbers to help me bridge 10 when adding or subtracting within 20, for example $8 + 7 = 8 + 2 + 5$, and show this on an empty number line. I can count on from the larger number to subtract within 20. I can double 2 digit multiples of 10. 	<ul style="list-style-type: none"> I can use my knowledge of doubles and near doubles to help me add up to 2 digits. I can partition 2 digit numbers to mentally add the ones then the tens, without carrying. I can use empty number lines or my own jottings to solve missing number problems within 100. I can use strategies to double any 2 digit number. <ul style="list-style-type: none"> I can partition 2 digit numbers to mentally add the ones then the tens, with carrying. I can use empty number lines or my own jottings to solve missing number problems within 100. Double any 2 digit number mentally.
<ul style="list-style-type: none"> I understand the relationship between adding and subtracting and can use this knowledge to create 'number families'. 	<ul style="list-style-type: none"> I can carry out an addition calculation to check my subtraction calculation I can carry out subtraction calculation to check my addition calculation. <ul style="list-style-type: none"> I understand the relationship between adding and subtracting and can use this to check written calculations.
<ul style="list-style-type: none"> I can count in tens forwards and backwards within 100 (multiples of 10). I can count in twos forwards and backwards within 100. 	<ul style="list-style-type: none"> I can count in tens forwards and backwards within 100 from any number, for example 34, 44, 54, 64... I can count in 100s up to at least 1000 from any number, for example 135, 235, 335... I can count in tens forwards and backwards within 1000 from any number, for example 345, 355, 365... <ul style="list-style-type: none"> I can multiply a single digit number by 10. I can divide a two digit multiple of 10 by a single digit, for example $80 \div 10$. <ul style="list-style-type: none"> I can multiply a single digit number by 100. I can divide a three digit multiple of 100 by 100, for example $600 \div 100$. I can divide a three digit multiple of 100 by 10, for example $400 \div 10$.

Numeracy and Mathematics Progression Framework

<ul style="list-style-type: none"> I can make equal groups using practical materials and combine or count them to make a larger number. I can use array dots to lay out equal groups and use this to calculate the total. I can use pictorial representations to show equal groups and can use this to calculate the total amount. 	<ul style="list-style-type: none"> I know that when we are multiplying we are making groups of a given amount e.g. 2×5 means 2 groups of 5. I can apply a range of strategies to determine multiplication facts, for example counting in jumps (skip counting), doubling, repeated, repeated addition and arrays – 2, 4 and 8 times tables. I can apply a range of strategies to determine multiplication facts, for example counting in jumps (skip counting), halving, repeated, repeated addition and arrays – 5 and 10 times tables. 	<ul style="list-style-type: none"> I can divide a three digit multiple of 10 by 10, for example $560 \div 10$. I can apply a range of strategies to determine multiplication facts, for example counting in jumps (skip counting), doubling, repeated, repeated addition and arrays – 3, 6 and 9 times tables. 	<ul style="list-style-type: none"> Applies strategies to determine multiplication facts, for example, repeated addition, grouping, arrays and multiplication facts.
<ul style="list-style-type: none"> I can take a larger group of items and share it into equal groups, for example “I have 15 cubes. I need to make 3 equal groups. How many cubes in each group?” I can split a group of items into smaller equal groups, for example “I have 16 cubes. How many groups of 4 can I make?” I can interpret and solve a range of one step word problems when I am told the operation being used. 	<ul style="list-style-type: none"> I can apply a range of strategies to determine division facts, for example repeated subtraction, grouping, arrays and multiplication facts – 2, 4 and 8 times tables. I can apply a range of strategies to determine division facts, for example repeated subtraction, grouping, arrays and multiplication facts – 5 and 10 times tables. I can interpret and solve a range of one step word problems when I have to work out the correct operation to complete the calculations 	<ul style="list-style-type: none"> I can apply a range of strategies to determine division facts, for example repeated subtraction, grouping, arrays and multiplication facts – 3, 6 and 9 times tables. 	<ul style="list-style-type: none"> Applies strategies to determine division facts, for example, repeated subtraction, equal groups, sharing equally, arrays and multiplication facts. Can solve two step problems.

<u>EARLY LEVEL</u>				
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can share out a group of items by making smaller groups and can split a whole object into smaller parts. MNU 0-07a</p>			
Progression Through Early Level				
<p>← →</p> <ul style="list-style-type: none"> • I can share a collection of objects equally. • I can understand that 2 halves make a whole. • I can recognise halves and know that they are an object split into two equal parts. • I can understand, identify the term $\frac{1}{2}$. • I can use my knowledge of doubles to identify half of even numbers to at least 10. • I can recall even number facts to divide evenly. • I know even numbers can be shared equally. 				
Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level <ul style="list-style-type: none"> • Splits a whole into smaller parts and explains that equal parts are the same size. • Uses appropriate vocabulary to describe halves. • Shares out a group of items equally into smaller groups. 				

Curriculum Organiser	Number, Money and Measure - Fractions, Decimal Fractions and Percentages		
Milestone/s	Fractional Notation and Vocabulary, Relationship Between Fractions, Multiplication and Division.		
FIRST LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>Having explored fractions by taking part in practical activities, I can show my understanding of:</p> <ul style="list-style-type: none"> • how a single item can be shared equally • the notation and vocabulary associated with fractions • where simple fractions lie on the number line. MNU 1-07a 		
Progression Through First Level  		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level	
<ul style="list-style-type: none"> • I can illustrate fractions using materials and pictures and discuss them. • I can find halves of 1 or 2 digit numbers up to at least 20. • I understand a single item can be shared into 4 equal parts - each part is one quarter. • I understand and can use the written form of fractions, for example $\frac{1}{2}$. • I can explain the role of numerator and denominator. • I can compare the size of fractions and understand where they sit on a 0 - 1 number line. 	<ul style="list-style-type: none"> • I can work with fifths and tenths. • I can find fractions of 1 or 2 digit numbers. • I understand that the greater number of portions, the smaller the size of each equal share. 	<ul style="list-style-type: none"> • I can find fractions of 1 or 2 digit numbers ($\frac{1}{2}, \frac{1}{3}, \frac{1}{4}, \frac{1}{5}, \frac{1}{10}$). 	<ul style="list-style-type: none"> • Explains what a fraction is using concrete materials, pictorial representations and appropriate mathematical vocabulary. • Demonstrates understanding that the greater the number of equal parts, the smaller the size of each share. • Uses the correct notation for simple fractions, up to at least tenths, for example, $\frac{1}{2}, \frac{2}{3}$ and $\frac{5}{8}$. • Compares the size of fractions and places simple fractions in order on a number line.

Experience and Outcome for Planning Teaching, Learning and Assessment	Through exploring how groups of items can be shared equally, I can find a fraction of an amount by applying my knowledge of division. MNU 1-07b
Progression Through First Level	
<ul style="list-style-type: none"> • I can find quarters of 1 or 2 digit numbers up to at least 20. • I can use my knowledge of division to find simple fractions. 	<ul style="list-style-type: none"> • Uses known multiplication and division facts and other strategies to find unit fractions of whole numbers, for example $\frac{1}{2}$ or $\frac{1}{4}$.

Experience and Outcome for Planning Teaching, Learning and Assessment	Through taking part in practical activities including use of pictorial representations, I can demonstrate my understanding of simple fractions which are equivalent. MTH 1-07c
Progression Through First Level	
<ul style="list-style-type: none"> • I can recognise the equivalence of $\frac{2}{4}$ and $\frac{1}{2}$ using practical resources. • I can recognise the equivalence of $\frac{1}{2}$ and $\frac{5}{10}$ using practical resources. • I can recognise the equivalence of $\frac{1}{2}$ and any other simple fraction. 	<ul style="list-style-type: none"> • Uses pictorial representations and other models to demonstrate understanding of simple equivalent fractions, for example, $\frac{1}{2} = \frac{2}{4} = \frac{3}{6}$. • Explains the role of the numerator and denominator.

Curriculum Organiser	Number, Money and Measure - Fractions, Decimal Fractions and Percentages		
Milestone/s	Relationship between Fraction, Multiplication and Division; Decimal Fractions and Place Value; Fractions, Percentages; Equivalent forms, Relationships that link Fractions, Decimal Fractions and Percentages		
SECOND LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I have investigated the everyday contexts in which simple fractions, percentages or decimal fractions are used and can carry out the necessary calculations to solve related problems.</p> <p>MNU 2-07a</p>		
Progression Through Second Level			Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> • Know that the numerator is the number on the top of a fraction and shows equal parts. • Know that the denominator is the number on the bottom of a fraction and shows parts a whole has been split into. • Understand that the larger the denominator is, the greater the number of parts the whole has been split into. <ul style="list-style-type: none"> • I can find fractions, decimal fractions and percentages which relate – $\frac{1}{2}$, 0.5, 50%. <ul style="list-style-type: none"> • I can mentally find basic percentages of whole numbers – 25%, 50%. 			<ul style="list-style-type: none"> • Calculates simple fractions of a quantity and uses this knowledge to solve problems in everyday contexts, for example, find $\frac{3}{5}$ of 60. <ul style="list-style-type: none"> • Uses knowledge of equivalent forms of common fractions, decimal fractions and percentages, for example, $\frac{3}{4} = 0.75 = 75\%$, to solve problems. <ul style="list-style-type: none"> • Calculates simple percentages of a quantity, and uses this knowledge to solve problems in everyday contexts, for example, calculates the sale price of an item with a discount of 15%.

Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can show the equivalent forms of simple fractions, decimal fractions and percentages and can choose my preferred form when solving a problem, explaining my choice of method. MNU 2-07b</p> <p>I have investigated how a set of equivalent fractions can be created, understanding the meaning of simplest form, and can apply my knowledge to compare and order the most commonly used fractions. MTH 2-07c</p>
Progression Through Second Level	Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> • I understand simple equivalences in fractions. • Is aware that hundredths can be written as a fraction, decimal fraction or a percentage. • I recognize a % symbol relates to number of parts out of 100. • I can use the written form of simple fractions – $\frac{1}{6}$, $\frac{1}{7}$, $\frac{1}{8}$ and $\frac{1}{9}$. • I understand that 100% is one whole, 50% is a half and 25% is a quarter. <ul style="list-style-type: none"> • I can simplify fractions using division. • I can show fractions in their simplest forms. • Can multiply and divide whole numbers and decimal fractions by multiples of 10. • I understand 75% is the same as three-quarters. • I understand the relationship between common fractions, percentages and decimal fractions - 100%, 75%, 50%, 25%, 10% and 1%. • I can recognise mixed numbers and improper fractions. 	<ul style="list-style-type: none"> • I can simplify fractions, decimal fractions and percentages and place them on a number line. • I can compare equivalent fractions. • I can recognise equivalence within hundredths. • I can identify the relationship between common fractions, percentages and decimal fractions - 66·6%, 33·3%, 20% and 5%. • Creates equivalent fractions and uses this knowledge to put a set of most commonly used fractions in order. • Expresses fractions in their simplest form.

Curriculum Organiser	Number, Money and Measure - Fractions, Decimal Fractions and Percentages	
Milestone/s	Equivalent Forms; Relationships that link Fractions, Decimal Fractions and Percentages	
THIRD LEVEL		
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can solve problems by carrying out calculations with a wide range of fractions, decimal fractions and percentages, using my answers to make comparisons and informed choices for real-life situations. MNU 3-07a</p> <p>By applying my knowledge of equivalent fractions and common multiples, I can add and subtract commonly used fractions. MTH 3-07b</p> <p>Having used practical, pictorial and written methods to develop my understanding, I can convert between whole or mixed numbers and fractions. MTH 3-07c</p> <p>I can show how quantities that are related can be increased or decreased proportionally and apply this to solve problems in everyday contexts. MNU 3-08a</p>	
Progression Through Third Level 		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> I can convert between whole or mixed numbers, improper fractions and decimal fractions. I can add and subtract fractions and mixed numbers with the same denominator. I can convert any fraction, decimal fraction or percentage into a fraction, decimal fraction or percentage. I can use knowledge of fractions, decimal fractions and percentages to carry out calculations with and without a calculator. I can solve simple problems involving direct proportion (for example: cost of 5 items compared to cost of 7). I understand the relationship between fractions, proportion and ratio. 	<ul style="list-style-type: none"> I can solve problems with a wide range of fractions, decimal fractions and percentages including finding a fraction or percentage of a quantity (with/without a calculator). I can add and subtract fractions and mixed numbers with any denominator. I can increase and decrease quantities proportionally (for example: percentage increase/decrease). I can simplify a ratio. I can share an amount in a given ratio. I can use ratio to solve problems. 	<ul style="list-style-type: none"> Converts fraction, decimal fractions or percentages into equivalent fractions, decimal fractions or percentages. Adds and subtracts whole numbers and fractions, including when changing a denominator. Converts between whole or mixed numbers, improper fractions and decimal fractions. Uses knowledge of fractions, decimal fractions and percentages to carry out calculations with and without a calculator. Solves problems in which related quantities are increased or decreased proportionally. Expresses quantities as a ratio and where appropriate simplifies, for example, 'if there are 6 teachers and 60 children in a school find the ratio of the number of teachers to the total amount of teachers and children'.

Curriculum Organiser	Number, Money and Measure - Time	
Milestone/s	Concept of time; Recording and Displaying; Units of Time; Telling the Time	
EARLY LEVEL		
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I am aware of how routines and events in my world link with times and seasons, and have explored ways to record and display these using clocks, calendars and other methods.</p> <p>MNU 0-10a</p>	
Progression Through Early Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> • I can order and talk about my day and events in my life • I can identify what things I do during the day and what things I do at night. • I know that day follows night and night follows day. • I can name the days of the week and I know their order • I know that there are four seasons and can name them • I can discuss ways of measuring and recording time for example - clocks, timers, sand timers, watches etc. • I know that clocks, watches and digital displays can tell you the time. • I can use basic visual timetables. • I have seen both analogue clock faces and digital displays and can recognise they both tell the time. • I can use the words yesterday, today and tomorrow when discussing time. • When discussing time, I can use the terms before and after appropriately. 	<ul style="list-style-type: none"> • I can put several events in time sequence. • I can name and sequence the days of the week and use language such as before, after, yesterday, tomorrow. • I can name and sequence the seasons. • I can talk about the features of each season and special events associated with them, for example Christmas, Easter • I can name and sequence the months of the year. • I can interpret basic visual timetables. • I can explore different types of calendars and understand what information they have and why they are helpful. • I can read analogue o'clock times (12 hour). • I can read digital o'clock times (12 hour). • I can represent o'clock on a digital display or clock face. • I know that an analogue clock has an hour hand and a minute hand. • I can use time language for example - before, after, o'clock, hour hand and minute hand. 	<ul style="list-style-type: none"> • Links daily routines and personal events to time sequences. • Names the days of the week in sequence, knows the months of the year and talks about features of the four seasons in relevant contexts. • Recognises, talks about, and, where appropriate, engages with everyday devices used to measure or display time, including clocks, calendars, sand timers and visual timetables. • Reads analogue and digital o'clock times (12 hour only) and represents this on a digital display or clock face. • Uses appropriate language when discussing time, for example, before, after, o'clock, hour hand and minute hand.

Curriculum Organiser	Number, Money and Measure - Time		
Milestone/s	Concept of Time; Recording and Displaying; Units of Time; Telling the Time; Duration of Time; Calendars		
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>FIRST LEVEL</p> <p>I can tell the time using 12 hour clocks, realising there is a link with 24 hour notation, explain how it impacts on my daily routine and ensure that I am organised and ready for events throughout my day.</p> <p>MNU 1-10a</p>		
	Progression Through First Level		
<ul style="list-style-type: none"> • I can tell the time using half and quarter past on analogue and digital 12 hour clocks. • I can convert between digital time and analogue displays using half past and quarter past. <ul style="list-style-type: none"> • I can name and sequence the months of the year. • I can link months to the appropriate season. • I know that 1 year has 12 months. • I know that 1 week is 7 days. • I understand values of time e.g. seconds are smaller than minutes, and years are longer than months. 	<ul style="list-style-type: none"> • I can tell the time using quarter to on analogue and digital 12 hour clocks. • I can convert between digital and analogue displays using quarter to. <ul style="list-style-type: none"> • I understand that am is before midday and pm is after midday. • I can record 12 hour times using am and pm correctly within 15 minute intervals. <ul style="list-style-type: none"> • I know that 1 minute is 60 seconds. • I know that 1 hour is 60 minutes. • I know the months of the year. • I am learning ways of remembering how many days are in each month. 	<ul style="list-style-type: none"> • I can convert between digital and analogue displays. <ul style="list-style-type: none"> • I know that 1 day is 24 hours. • I know that there is 52 weeks in a year. • I know that there is 365 days in a year. • I know that there is 366 days in a leap year and why there is a leap year. • I know how many days are in each month. 	<ul style="list-style-type: none"> • Tells the time using half past, quarter past and quarter to using analogue and digital 12 hour clocks. <ul style="list-style-type: none"> • Record 12 hour times using am and pm and is able to identify 24 hour notation in real life examples, for example, on a mobile phone or computer. <ul style="list-style-type: none"> • Knows the number of seconds in a minute, minutes in an hour, hours in a day, days in each month, weeks and days in a year. • Sequences the months of the year and relates these to the appropriate seasons.

Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can use a calendar to plan and be organised for key events for myself and my class throughout the year. MNU 1-10b</p>		
Progression Through First Level	Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level		
<ul style="list-style-type: none"> • I can place tasks into a daily timetable/diary. • I know the months of the year in order. 	<ul style="list-style-type: none"> • I can record dates on my work using a variety of ways, for example 7th April 2015, 07.04.15 or 7/4/15. • I know the ordinal number of the months, for example January is the first month. • I can place events into a weekly timetable/diary. • I can read a timetable in 12 hour notation. • I can relate the months of the year to their seasons. 	<ul style="list-style-type: none"> • I can change dates between the full format (7th April 2015) and the short format (07.04.15 or 7/4/15). • I can add important events to a calendar, for example, birthdays. • I can use timetables in 12 hour notation to plan key events. • I can use a variety of timetables or calendars to calculate durations. 	<ul style="list-style-type: none"> • Records the date in a variety of ways, using words and numbers. • Uses and interprets a variety of calendars and 12 hour timetables to plan key events and calculate durations. • Orders the months of the year and relates these to appropriate seasons.
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I have begun to develop a sense of how long tasks take by measuring the time taken to complete a range of activities using a variety of timers. MNU 1-10c</p>		

Curriculum Organiser	Number, Money and Measure - Time		
Milestone/s	Units of Time, Telling the Time; Duration of Time; Calendars; Converting Units of Time; Time Calculations including more Complex Durations; Using Appropriate Units of Time; Time, Speed, Distance		
SECOND LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can use and interpret electronic and paper-based timetables and schedules to plan events and activities, and make time calculations as part of my planning. MNU 2-10a</p> <p>I can carry out practical tasks and investigations involving timed events and can explain which unit of time would be most appropriate to use. MNU 2-10b</p>		
Progression Through Second Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level	
←			→
<ul style="list-style-type: none"> • I can discuss the difference between 12 hour and 24 hour notation. • I can read and record both 12 hour and 24 hour notation. • I can convert between 12 hour and 24 hour notation. • I can calculate durations of activities and events, including situations bridging across several hours and using both 12 hour and 24 hour notation. • I can use and interpret a range of electronic and paper-based timetables and calendars to plan an event or activity. 	<ul style="list-style-type: none"> • I can calculate start time, end time or duration from a range of electronic and paper-based timetables and calendars. • I can calculate durations of activities and events, including situations bridging across parts of hours using both 12 hour and 24 hour notation. • I know the relationship between commonly used units of time. • I can carry out simple conversion calculations between hours, minutes and seconds, for example changing $1\frac{3}{4}$ hours into minutes. • I know that a decade is 10 years. • I know that a century is 100 years. • I know that a millennium is 1000 years. 	<ul style="list-style-type: none"> • I can investigate how long a journey will take using online route planners. • I can investigate common units for measuring speed for example - speed limits. • I can estimate the time taken for a journey based on criteria given. • I can use a stopwatch to calculate metres per second. • I can convert between units of time to solve problems. • I can choose the most appropriate timing device in practical situations. • I can choose the most relevant units to record when measuring time, including hundredths of a second. • I can convert times into common units, for example 90 minutes = 1.5 hours. 	<ul style="list-style-type: none"> • Reads and records any time in both 12 hour and 24 hour notation and converts between the two. • Knows the relationships between commonly used units of time and carries out simple conversion calculations, for example, changes $1\frac{3}{4}$ hours into minutes. • Uses and interprets a range of electronic and paper-based timetables and calendars to plan events or activities and solve real life problems. • Calculates durations of activities and events, including situations bridging across several hours and parts of hours using 12 hour and 24 hour notation. • Selects most appropriate unit of time for a given task and justifies choice. • Chooses most appropriate timing device in practical situations and records using relevant units, including hundredths of a second.

Experience and Outcome for Planning Teaching, Learning and Assessment	Using simple time periods, I can give a good estimate of how long a journey should take, based on my knowledge of the link between time, speed and distance. MNU 2-10c
Progression Through Second Level	
<ul style="list-style-type: none"> • I can calculate the duration (time) when I know the speed and distance. • I understand what is meant by miles per hour (mph) and kilometres per hour (km/h) and solve simple problems using this. • I can investigate ways that time, speed and distance can be measured. 	<ul style="list-style-type: none"> • Estimates the duration of a journey based on knowledge of the link between speed, distance and time.

Curriculum Organiser	Number, Money and Measure - Time
Milestone/s	Time Calculations including more complex durations; Time, Speed, Distance
THIRD LEVEL	
Experience and Outcome for Planning Teaching, Learning and Assessment	Using simple time periods, I can work out how long a journey will take, the speed travelled at or distance covered, using my knowledge of the link between time, speed and distance.
MNU 3-10a	
Progression Through Third Level	
<ul style="list-style-type: none"> • I can use the formula which shows the relationship between speed, distance and time to find each of the three variables (whole numbers only). • I can convert time into simple fractional and decimal fractional hours. • I can calculate or measure time durations across hours and days. 	<ul style="list-style-type: none"> • Applies knowledge of the relationship between speed, distance and time to find each of the three variables. • Calculate time durations across hours and days.

Curriculum Organiser	Number, Money and Measure - Time			
Milestone/s	Time-Speed/Distance; Time Management			
FOURTH LEVEL				
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can research, compare and contrast aspects of time and time management as they impact on me. MNU 4-10a</p> <p>I can use the link between time, speed and distance to carry out related calculations. MNU 4-10b</p>			
Progression Through Fourth Level				
<p>← →</p> <ul style="list-style-type: none"> • I can convert time into fractions and decimal fractions. • I can calculate time durations across hours, days and months. <ul style="list-style-type: none"> • I can use the link between speed, distance and time to calculate an unknown, including fractions and decimal fractions of time. • I can use the correct formula for speed, distance and time to calculate each of the three variables including working with simple fractional and decimal fractional hours, for example $\frac{1}{2}$, $0 \cdot 5$, $\frac{1}{4}$, $0 \cdot 25$, $\frac{3}{4}$, $0 \cdot 75$. 				
<p>Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level</p> <ul style="list-style-type: none"> • I can solve real life time problems, including working with different time zones, including across midnight. • I can interpret the solutions to time problems and relate these to demonstrating effective time management. • I have experience of scheduling tasks within a given time. <ul style="list-style-type: none"> • I can use the correct formula for speed, distance and time to calculate each of the three variables using any decimal fraction to represent time. 				
<ul style="list-style-type: none"> • Demonstrates effective time management skills, for example, working with different time zones or making plans, including across midnight. • Calculates time durations across hours, days and months. <ul style="list-style-type: none"> • Carries out calculations involving speed, distance and time involving decimal fraction hours.

Milestone/s	Awareness of Size and Amount; Comparison of Size and Amount; Non-Standard Units/Concept of Area; Concept of Volume	
EARLY LEVEL		
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I have experimented with everyday items as units of measure to investigate and compare sizes and amounts in my environment, sharing my findings with others.</p> <p>MNU 0-11a</p>	
Progression Through Early Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> • I can give examples of where measurement is used, for example in baking. • I can use language of measure to describe what I have found out. • I can put objects in order according to length. • I can put objects in order according to weight. • I can use a variety of objects to measure length. • I can use a variety of objects to measure weight. 	<ul style="list-style-type: none"> • I can put objects in order using length, height, mass or capacity. • I can compare some differences in non-standard measurements. • I can estimate how long or heavy an object is or how much a container will hold. • I can use full/empty, long/short, wide/narrow, tall/short, and heavy/light and holds more/holds less. • I can measure the length, mass and height of familiar objects using non-standard units. • I can record findings of practical investigations. 	<ul style="list-style-type: none"> • Shares relevant experiences in which measurements of lengths, heights, mass and capacity are used, for example, in baking. • Describes common objects using appropriate measurement language, for example, tall, heavy and empty. • Compares and describes lengths, heights, mass and capacity using everyday language including longer, shorter, taller, heavier, lighter, more and less. • Estimates, then measures, the length, height, mass and capacity of familiar objects using a range of appropriate non-standard units.

Curriculum Organiser	Number, Money and Measure – Measurement		
Milestone/s	Comparison of Size and Amount; Concept of Area; Concept of Volume; Standard Units; Calculations involving Measurement		
FIRST LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can estimate how long or heavy an object is, or what amount it holds, using everyday things as a guide, then measure or weigh it using appropriate instruments and units. MNU 1-11a</p> <p>I can estimate the area of a shape by counting squares or other methods. MNU 1-11b</p>		
Progression Through First Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level	
<ul style="list-style-type: none"> • I can use non-standard units to estimate and measure length, height, mass and capacity. • I can estimate how many tiles/blocks it would take to cover a shape exactly and investigate this. 	<ul style="list-style-type: none"> • I can estimate and accurately measure length, height, weight and capacity using appropriate standard units, for example metres and centimetres, kilograms and grams, litres and millilitres. • I can select and use appropriate devices to measure length, height, weight and capacity, reading scales accurately. • I can count squares to measure the area of a shape. • I can create shapes with a given area using square tiles or grids. • I can recognise that different shapes can have the same area. 	<ul style="list-style-type: none"> • I can show my understanding of the relationship between units in standard units of measurement, for example $1\text{m} = 100\text{cm}$, $1\text{kg} = 1000\text{g}$. • I can read scales identifying points between full units using my knowledge of fractions. • I can compare my initial estimate to my final answer. • I can use a grid to estimate the area of simple 2D shapes. • I can create shapes within a given area to at least the nearest half square using square tiles or grids. 	<ul style="list-style-type: none"> • Uses knowledge of everyday objects to provide reasonable estimates of length, height, mass and capacity. • Makes accurate use of a range of instruments including rulers, metre sticks, and digital scales and measuring jugs when measuring lengths, heights, mass and capacities using the most appropriate instrument for the task. • Records measurements of length, height, mass and capacity using the appropriate standard units, for example, millimetres (mm), centimetres (cm), grams (g), kilograms (kg), millimetres (ml), litres (l). • Compares the measure with the estimate. • Uses knowledge of relationships between units of measure to make simple conversions, for example, $1\text{m } 58 = 158\text{cm}$. • Read a variety of scales on measuring devices, including those with fractions, for example $\frac{1}{2}$ • Uses square grids to estimate then measure the areas of a variety of simple 2D shapes to at least the nearest half square. • Creates shapes with a given area to at least the nearest half square using square tiles or grids. • Recognises that different shapes can have the same area (conservation of area).

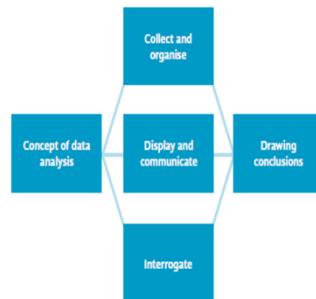

Curriculum Organiser	Number, Money and Measure – Measurement					
Milestone/s	Concept of Area; Concept of Volume; Standard Units; Convert Units; Calculations involving Measurement; Formula and Interrelationships					
SECOND LEVEL						
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can use my knowledge of the sizes of familiar objects or places to assist me when making an estimate of measure. MNU 2-11a</p> <p>I can use the common units of measure, convert between related units of the metric system and carry out calculations when solving problems. MNU 2-11b</p> <p>I can explain how different methods can be used to find the perimeter and area of a simple 2D shape or volume of a simple 3D object. MNU 2-11c</p>					
Progression Through Second Level						
<p>← →</p> <ul style="list-style-type: none"> • I can accurately measure and estimate the size and distance of objects using the appropriate tools and units. • I can estimate the size of familiar objects by comparing them to another object. • I know the value of units of measure, for example $1000\text{m} = 1\text{km}$, $1000\text{g} = 1\text{kg}$, $10\text{mm} = 1\text{cm}$ etc. and can convert between them. • I can choose the most appropriate measuring device for a given task and can read it accurately. <ul style="list-style-type: none"> • I can apply my skills of measuring accurately using appropriate units of measure. • I can investigate the size of familiar objects and use this knowledge to estimate and accurately compare length, mass, area or capacity. • I can convert between different units of measure, for example $3.5\text{km} = 3500\text{m}$ or $1 \text{metre } 25 \text{ centimetres} = 1.25\text{m}$ • I can read scales on measuring devices calculating unmarked intervals. • I know and understand that in everyday life we use imperial units, for example miles or stones. <ul style="list-style-type: none"> • I can select appropriate units of measurement to solve problems. • I can show my understanding of measurement of familiar objects and through problem solving. • I can record measurements in a variety of ways using decimal notation up to 3 places, for example $550\text{cm} = 5.5\text{m}$ or $3.009\text{kg} = 3\text{kg } 9\text{g}$. 						
<p>Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level</p> <ul style="list-style-type: none"> • Estimates to the nearest appropriate unit, then measures accurately: length, height and perimeter in millimetres (mm), centimetres (cm) and metres (m); distances in kilometres (km); weights in grams (g) and kilograms (kg); capacity in millilitres (ml) and litres (l). • Uses the comparative size of familiar objects to make reasonable estimations of length, mass, area and capacity. • Converts between common units of measurement using decimal notation, for example, $550\text{cm} = 5.5\text{m}$; $3.009\text{kg} = 3009\text{g}$ and applies this knowledge when solving problems. • Chooses the most appropriate measuring device for a given task, carrying out the required calculation, recording results in the correct unit. • Reads a variety of scales accurately. • Demonstrates understanding of the conservation of measurement. • Shows awareness of imperial units used in everyday life, for example, miles or stones 						

Curriculum Organiser	Number, Money and Measure – Measurement		
Milestone/s	Concept of Area; Concept of Volume; Standard Units; Convert Units; Calculations involving Measurement; Formula and Interrelationships		
SECOND LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	I can explain how different methods can be used to find the perimeter and area of a simple 2D shape or volume of a simple 3D object. MNU 2-11c		
<ul style="list-style-type: none"> I can calculate perimeter of squares and rectangles by adding the sides. I can calculate the area of rectangles and squares by multiplying two adjacent sides. I can investigate and measure the volume of a range of containers using water. 	<ul style="list-style-type: none"> I can use a given perimeter or area to draw shapes accurately. I can calculate the perimeter of 2D shapes using the correct units. I can investigate the perimeter of shapes with the same area. I can calculate the area of composite shapes made from squares and rectangles. I can use cubes to measure containers. 	<ul style="list-style-type: none"> I can use formula to calculate perimeter of squares and rectangles. I can calculate the area of a right angled triangle using the knowledge $A = \frac{1}{2} \times l \times b$. I can draw a triangle accurately given perimeter or area. I can calculate the area of composite shapes made from squares, rectangles and triangles. I can calculate the area of a parallelogram. I can calculate the volume of cubes and cuboids using the formula $V = l \times b \times h$ and the correct units. 	<ul style="list-style-type: none"> Draws squares and rectangles accurately with a given perimeter or area. Calculates the perimeter of simple straight-sided 2D shapes in millimetres (mm), centimetres (cm) and metres (m) and explains the choice of method used. Calculates the area of squares, rectangles and right angled triangles in square millimetres (mm^2) square centimetres (cm^2) and square metres (m^2) and explains the choice of method used. Calculates the volume of simple 3D objects in cubic centimetres (cm^3) and cubic metres (m^3) and explains the choice of method used.

Curriculum Organiser	Number, Money and Measure – Measurement	
Milestone/s	Standard Units; Convert Units; Calculations Involving Measurement; Formula and Inter-relationships	
THIRD LEVEL		
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can solve practical problems by applying my knowledge of measure, choosing the appropriate units and degree of accuracy for the task and using a formula to calculate area or volume when required. MNU 3-11a</p> <p>Having investigated different routes to a solution, I can find the area of compound 2D shapes and the volume of compound 3D objects, applying my knowledge to solve practical problems. MTH 3-11b</p>	
Progression Through Third Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> • I can provide realistic estimates or measurements using appropriate units. • I ensure the units are consistent across the problem by converting between metric units. • I can choose the appropriate degree of accuracy to work with by considering the information given or instrument used. • I can convert between standard units to 3 decimal places when solving calculations of length, capacity, volume and area. • I can calculate the area of a 2D shapes where different units are used. • I can calculate the area of compound 2D shapes constructed from squares, rectangles and triangles. • I can calculate the volume of cubes and cuboids using the appropriate formula $V = l^3$ and $V = l \times b \times h$ • I can calculate the volume of a 3D object where different units are used. 		<ul style="list-style-type: none"> • Chooses appropriate units for length, area and volume when solving practical problems. • Converts between standard units to 3 decimal places and applies this when solving calculations of length, capacity, volume and area. • Calculates the area of a 2D shape where the units are inconsistent. • Finds the area of compound 2D shapes constructed from squares, rectangles and triangles. • Finds the volume of compound 3D objects constructed from cubes and cuboids.

Curriculum Organiser	Number, Money and Measure – Measurement	
Milestone/s	Formula and Inter-relationships; Tolerance in Measurement	
FOURTH LEVEL		
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can apply my knowledge and understanding of measure to everyday problems and tasks and appreciate the practical importance of accuracy when making calculations. MNU 4-11a</p> <p>Through investigating real-life problems involving the surface area of simple 3D shapes, I can explore ways to make the most efficient use of materials and carry out the necessary calculations to solve related problems. MTH 4-11b</p> <p>I have explored with others the practicalities of the use of 3D objects in everyday life and can solve problems involving the volume of a prism, using a formula to make related calculations when required. MTH 4-11c</p>	
Progression Through Fourth Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> • I can apply my knowledge and understanding of measure to a range of problems and tasks. • I understand tolerance and how this can impact on accuracy when measuring. • I know that rounding numbers inappropriately in a calculation will lead to an insufficiently accurate answer. • I consider the practical importance of accuracy when making calculations. • I can calculate the area of kites, parallelograms and trapeziums. • I can use formulae to calculate the surface area of cylinders, cuboids and triangular prisms. • I can use formulae to solve problems to calculate the volume of triangular prisms and cylinders. • I can calculate the volume of prisms using the appropriate formula $V = Ah$ where A is the area of the cross section. 		<ul style="list-style-type: none"> • Demonstrates the understanding of the impact of truncation and premature rounding. • Calculate the area of kites, parallelograms and trapeziums. • Uses formulae and calculates the surface area of cylinders, cuboids and triangular prisms. • Calculates the volume of triangular prisms and cylinders using formulae.

<p>graphs, charts, collect, data, pictogram</p>	<p>bar graph, block graph, tables, Carroll diagrams, Venn diagrams, axes</p>	<p>survey, line graph, frequency table, pie chart, spreadsheets</p>		
<p>robust, vague, misleading, sample size, representative sample, bias, trend, compound bar graph/line graph</p>	<p>mean, median, mode, range, data set, grouped data, continuous data, discrete data, stem and leaf, scatter diagram</p>			

Curriculum Organiser	Information Handling – Data and Analysis	
Milestone/s	Concept of Data Analysis; Collect and Organise; Display and Communicate	
EARLY LEVEL		
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can collect objects and ask questions to gather information, organising and displaying my findings in different ways. MNU 0- 20a</p> <p>I can match objects, and sort using my own and others' criteria, sharing my ideas with others. MNU 0- 20b</p> <p>I can use the signs and charts around me for information, helping me plan and make choices and decisions in my daily life. MNU 0- 20c</p>	
Progression Through Early Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> • I can explain and justify the ways in which I have sorted. • I can record info in a variety of ways. • I can use the signs and charts around me for information. 	<ul style="list-style-type: none"> • I can obtain information for a task from a picture, video or story. • I can collect information about myself and about other pupils then sort data. • I can make a tally as collections of objects. • I can collate data into a simple table that communicates the process and justifies the choice of criteria. • I can interpret simple charts and graphs and demonstrate how they support planning, choices and decision making in familiar situations by applying to real life contexts. • I can create a simple pictogram independently, using digital technologies as appropriate. 	<ul style="list-style-type: none"> • Asks simple questions to collect data for a specific purpose. • Collects and organises objects for a specific purpose. • Applies counting skills to ask and answer questions, make relevant choices and decisions based on the data. • Uses knowledge of colour, shape, size and other properties to match and sort items in a variety of different ways. • Contributes to concrete or pictorial displays where one object or drawing represents one data value, using digital technologies as appropriate. • Interprets simple graphs, charts and signs and demonstrates how they support planning, choices and decision making.

Curriculum Organiser	Information Handling – Data and Analysis		
Milestone/s	Collect and Organise; Display and Communicate		
Experience and Outcome for Planning Teaching, Learning and Assessment	<u>FIRST LEVEL</u>		
	<p>I have explored a variety of ways in which data is presented and can ask and answer questions about the information it contains. MNU 1- 20a</p> <p>I have used a range of ways to collect information and can sort it in a logical, organised and imaginative way using my own and others' criteria. MNU 1- 20b</p> <p>Using technology and other methods, I can display data simply, clearly and accurately by creating tables, charts and diagrams, using simple labelling and scale. MTH 1-21a</p>		
← →			
Progression Through First Level			
<ul style="list-style-type: none"> • I can conduct a survey, for example using a questionnaire with yes or no answers. • I can interpret information from bar graphs and diagrams. • I can complete a bar graph, table or diagram using information given and give it relevant labelling. • I can use tally marks to represent quantity and total them at the end. 	<ul style="list-style-type: none"> • I can conduct a survey involving four options or choices. • I can interpret information from tables and charts. • I can construct a bar graph which has a title, two axes labelled, bars evenly spaced etc. • I can construct a table or diagram including relevant labelling. • I can, with assistance, create a bar graph using digital technologies. 	<ul style="list-style-type: none"> • I can independently collect, organise, display and interpret information using bar graphs, tables, diagrams and charts. • I can make use of digital technologies to display data, for example, as block graphs, bar graphs, tables, Carroll diagrams and Venn diagrams. • I can use a simple data base to check information, for example my own details. 	<ul style="list-style-type: none"> • Asks and answers questions to extract key information from a variety of data sets including charts, diagrams, bar graphs and tables. • Selects and uses the most appropriate way to gather and sort data for a given purpose, for example, a survey, questionnaire or group tallies. • Uses a variety of different methods, including the use of digital technologies, to display data, for example, as block graphs, bar graphs, tables, Carroll diagrams and Venn diagrams. • Includes a suitable title, simple labelling on both axes and an appropriate scale where one unit represents more than one data value in graphs.

Curriculum Organiser	Information Handling – Data and Analysis		
Milestone/s	Collect and Organise, Display and Communicate, and Interrogate		
SECOND LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>Having discussed the variety of ways and range of media used to present data, I can interpret and draw conclusions from the information displayed, recognising that the presentation may be misleading. MNU 2- 20a</p> <p>I have carried out investigations and surveys, devising and using a variety of methods to gather information and have worked with others to collate, organise and communicate the results in an appropriate way. MNU 2- 20b</p> <p>I can display data in a clear way using a suitable scale, by choosing appropriately from an extended range of tables, charts, diagrams and graphs, making effective use of technology. MTH 2-21a / MTH 3-21a</p>		
Progression Through Second Level			Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> • I can independently collect, organise, display and interpret information using bar graphs, tables and charts. • I can use a simple data base to extract information. • I can create a bar graph using digital technologies. 			<ul style="list-style-type: none"> • I can independently collect, organise, display and interpret information using bar graphs, tables and charts and line graphs. • I can create a simple data base. • I can create a line graph and spread sheet using digital technologies. <ul style="list-style-type: none"> • I can independently collect, organise, display and interpret information using a range of graphs, tables and pie charts (pre-sectioned). • I can understand that data is presented in a variety of ways by the media and it is not always reliable.

Curriculum Organiser	Information Handling – Data and Analysis		
Milestone/s	Collect and Organise, Display and Communicate, Interrogate and Draw Conclusions		
THIRD LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can work collaboratively, making appropriate use of technology, to source information presented in a range of ways, interpret what it conveys and discuss whether I believe the information to be robust, vague or misleading. MNU 3- 20a</p> <p>When analysing information or collecting data of my own, I can use my understanding of how bias may arise and how sample size can affect precision, to ensure that the data allows for fair conclusions to be drawn. MTH 3- 20b</p> <p>I can display data in a clear way using a suitable scale, by choosing appropriately from an extended range of tables, charts, diagrams and graphs, making effective use of technology. MTH 2-21a / MTH 3-21a</p>		
Progression Through Third Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level	
<ul style="list-style-type: none"> • I can find information in text, numerical, pictorial form from a variety of sources. • I can discuss problems involved with carrying out a real-life survey. • I can make appropriate conclusions from given data. • I can source data and make appropriate conclusions. • I can describe the trend in data. • I can justify the sample size for my data collection and explain how bias may arise. • I can construct and interpret pie charts (not pre-sectioned). 		<ul style="list-style-type: none"> • I can interpret, describe and discuss the important features of a data set and discuss whether I believe the information to be robust, vague or misleading. • When analysing information or collecting my own data I understand that bias may arise and the sample size can affect precision. I use this knowledge when I design my data collection process and when I justify my conclusions and predictions. • I can draw compound bar graphs and line graphs and pie charts. 	

Curriculum Organiser	Information Handling – Data and Analysis	
Milestone/s	Collect and Organise; Display and Communicate; Interrogate; Drawing Conclusions	
Experience and Outcome for Planning Teaching, Learning and Assessment	FOURTH LEVEL	
	<p>I can evaluate and interpret raw and graphical data using a variety of methods, comment on relationships I observe within the data and communicate my findings to others. MNU 4- 20a</p> <p>In order to compare numerical information in real life contexts, I can find the mean, median, mode and range of sets of numbers, decide which type of average is most appropriate to use and discuss how using an alternative type of average could be misleading. MTH 4- 20b</p> <p>I can select appropriately from a wide range of tables, charts, diagrams and graphs when displaying discrete, continuous or grouped data, clearly communicating the significant features of the data. MTH 4-21a</p>	
Progression Through Fourth Level		
 <ul style="list-style-type: none"> • I can interpret and communicate conclusions from a variety of sources (raw and graphical data). • I can calculate the mean, median, mode and range of a data set and justify which average I use. • I can discuss the meaning of the above in context of the given situation. • I can draw an appropriate line of best fit on a scatter diagram and use this to solve problems in context. • I can draw and interpret a stem and leaf diagram. 	 <ul style="list-style-type: none"> • I can independently carry out a statistical investigation, present findings, discuss and justify my conclusions. • I can calculate the mean from grouped data and discuss the meaning in context. • I can create and complete a frequency table for discrete and grouped data. • Given any piece of data (in any form) I can describe any trends there might be in appropriate language. 	Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level <ul style="list-style-type: none"> • Interprets raw and graphical data. • Uses statistical language, for example, correlations to describe identified relationships. • Calculates the mean, median, mode and range of a data set. • Selects the most appropriate statistical diagram to display a given data set, for example, stem and leaf. • Justifies the most appropriate statistical diagram to display a given data set. • Uses different types of charts to display discrete, continuous and grouped data appropriately.

<p>alternate angles, vertically opposite angles, corresponding angles, rotational symmetry</p>	<p>Cartesian Grid</p>										

Curriculum Organiser	Shape, Position and Movement - Angles, Symmetry and Transformation		
Milestone/s	Positional Language; Directions and Turning; Understanding Symmetry; Symmetry		
EARLY LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>In movement, games, and using technology I can use simple directions and describe positions. MTH 0-17a</p> <p>I have had fun creating a range of symmetrical pictures and patterns using a range of media. MTH 0-19a</p>		
Progression Through Early Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level	
<ul style="list-style-type: none"> • I can use positional words to describe where things/people are. • I can respond to and use vocabulary to describe a movement or journey e.g. up/down/across. • I can create a symmetrical picture by folding. • I can understand and use the term "the same" while making symmetrical pictures. • I can use the term "symmetrical" while making symmetrical pictures. 		<ul style="list-style-type: none"> • I can find an object from given directions. • I can move a device forwards, backwards, left and right. • I can describe a journey when solving a problem. • I can recognise when a shape is symmetrical with at least one line of symmetry. • I can create or complete some simple symmetrical shapes/pictures. • I can collect items or pictures of items from real life that are symmetrical, for example leaves, insects. 	<ul style="list-style-type: none"> • Understands and correctly uses the language of position and direction, including in front, behind, above, below, left, right, forwards and backwards, to solve simple problems in movement games. • Identifies, describes and creates symmetrical pictures with one line of symmetry.

Curriculum Organiser	Shape, Position and Movement - Angles, Symmetry and Transformation		
Milestone/s	Angles; Angle Relationships; Bearings; Grid References; Symmetry		
FIRST LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can describe, follow and record routes and journeys using signs, words and angles associated with direction and turning. MTH 1-17a</p> <p>I have developed an awareness of where grid reference systems are used in everyday contexts and can use them to locate and describe position. MTH 1-18a</p> <p>I have explored symmetry in my own and the wider environment and can create and recognise symmetrical pictures, patterns and shapes. MTH 1-19a</p>		
Progression Through First Level			Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> I can use positional vocabulary such as left and right, backwards and forwards, up and down. I can follow instructions to find an object. I can give specific instructions to find an object. 			<ul style="list-style-type: none"> I can recognise a right angle and know that a right angle is 90°. I can use informal methods to estimate and measure whether angles are greater or less than 90°. I can find right angles in my environment and in 2D shapes. I can give and understand directions for turning through angles including full turn, half turn, quarter turn, clockwise, anticlockwise, right turn, left turn, right angle. I can plot coordinates on a grid.
<ul style="list-style-type: none"> I can investigate symmetry in simple 2D shapes. I can find one line of symmetry in 2D shapes. I can complete the missing half of a symmetrical pattern or shape. 			<ul style="list-style-type: none"> I can create a square or rectangle by giving instructions using technology. I can follow and give directions using the names of 4 compass points. I can recognise the names of the 4 compass points and relate them to the appropriate angles. I can find 2 lines of symmetry on shapes. I can create a symmetrical pattern or design with more than one line of symmetry

Curriculum Organiser	Shape, Position and Movement - Angles, Symmetry and Transformation		
Milestone/s	Angles; Angle Relationships; Bearings; Grid References; Coordinate System; Scale		
SECOND LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I have investigated angles in the environment and can discuss, describe and classify angles using appropriate mathematical vocabulary. MTH 2-17a</p> <p>I can accurately measure and draw angles using appropriate equipment, applying my skills to problems in context. MTH 2-17b</p> <p>Through practical activities which include the use of technology, I have developed my understanding of the link between compass points and angles and can describe, follow and record directions, routes and journeys using appropriate vocabulary. MTH 2-17c</p> <p>Having investigated where, why and how scale is used and expressed, I can apply my understanding to interpret simple models, maps and plans. MTH 2-17d</p> <p>I can use my knowledge of the co-ordinate system to plot and describe the location of a point on a grid. MTH 2-18a / MTH 3-18a</p> <p>I can illustrate the lines of symmetry for a range of 2D shapes and apply my understanding to create and complete symmetrical pictures and patterns. MTH 2-19a / MTH 3-19a</p>		
Progression Through Second Level			Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> • I know a right angle is 90°, a straight line is 180° and a full turn is 360°. • I know an acute angle is less than 90°. • I know an obtuse angle is more than 90° but less than 180°. • I know a reflex angle is more than 180°, but less than 360°. • I can use technology to draw a range of angles. • I can accurately measure angles up to 180°. • I know the eight compass points. • I can follow and give directions involving the eight compass points. 			<ul style="list-style-type: none"> • I can accurately measure angles up to 360°. • I can calculate missing angle(s) in a triangle. • I can use technology to draw a range of angles. • I know the three figure bearings for the eight compass points. • I can draw any bearing up to 180°. • I know that supplementary angles add to 180° and can carry out calculations using this knowledge. • I know that complementary angles add to 90° and can carry out calculations using this knowledge. • I can calculate missing angle(s) in quadrilaterals and regular polygons. • I can construct and draw angles using a ruler and a protractor. • I can use my knowledge of angles to solve problems. • I can use standard notation to record any 3 figure bearing, for example 060°.

<ul style="list-style-type: none"> • I can use grid references to read, plot and record locations on a grid. • I can identify and draw lines of up to 4 lines of symmetry on 2D shapes. • I can complete and/or create symmetrical shapes and patterns with and without digital technology. 	<ul style="list-style-type: none"> • I can use my knowledge of the coordinate system to plot and describe the location of a point on a grid. • I can identify and draw all lines of symmetry on a wide range of 2D shapes. 	<ul style="list-style-type: none"> • Interprets maps, models or plans with simple scales, for example, 1cm: 1km. • Describes, plots and records the location of a point in the first quadrant on a grid using coordinate notation. • Identifies and illustrates all lines of symmetry on a wide range of 2D shapes and applies this understanding to complete a range of symmetrical patterns, with and without the use of digital technologies.
--	--	---

Curriculum Organiser	Shape, Position and Movement - Angles, Symmetry and Transformation		
Milestone/s	Angles; Angle Relationships; Bearings; Enlargement and Reduction; Similarity: Transformations		
THIRD LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I can name angles and find their sizes using my knowledge of the properties of a range of 2D shapes and the angle properties associated with intersecting and parallel lines. MTH 3-17a</p> <p>Having investigated navigation in the world, I can apply my understanding of bearings and scale to interpret maps and plans and create accurate plans, and scale drawings of routes and journeys. MTH 3-17b</p> <p>I can apply my understanding of scale when enlarging or reducing pictures and shapes, using different methods, including technology. MTH 3-17c</p> <p>I can use my knowledge of the coordinate system to plot and describe the location of a point on a grid. MTH 3-18a</p> <p>I can illustrate the lines of symmetry for a range of 2D shapes and apply my understanding to create and complete symmetrical pictures and patterns. MTH 3-19a</p>		
Progression Through Third Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level	
<ul style="list-style-type: none"> • I know that the sum of the 3 angles of a triangle add to 180° and find missing angles. • I know that the angles around a point add to 360° and find missing angles. • I can name angles using appropriate notation, for example, $\angle ABC$. • I can measure bearings on a map or plan. • I can measure and read distance from a scale map or plan. • I can draw bearings onto a map or plan to plot a route or journey. • I can draw routes or journeys onto a scale map or plan. • I can use a scale factor to enlarge a picture or shape. • I have explored how digital technology can be used to enlarge or reduce pictures. 		<ul style="list-style-type: none"> • I understand vertically opposite angles, corresponding angles and alternate angles and can use these to find missing angles. • I can create a scale map or plan and record routes or journeys with bearings and distances. • I can calculate bearings and distances from a scale map or plan. • I understand that a fractional scale factor can create a reduction. 	<ul style="list-style-type: none"> • Names angles using mathematical notation, for example, $\angle ABC$ • Identifies corresponding, alternate and vertically opposite angles and uses this knowledge to calculate missing angles. • Uses the angle properties of triangles and quadrilaterals to find missing angles. • Applies knowledge and understanding of scale to enlarge and reduce objects in size showing understanding of linear scale factor. • Uses bearings in a navigational context including creating scale drawings. • Identifies all lines of symmetry in 2D shapes. • Creates symmetrical patterns and pictures.

Curriculum Organiser	Shape, Position and Movement - Angles, Symmetry and Transformation
Milestone/s	Symmetry; Angles; Scale; Enlargement and Reduction; Coordinate System; Transformations
Experience and Outcome for Planning Teaching, Learning and Assessment	FOURTH LEVEL Having investigated the relationship between a radius and a tangent and explored the size of the angle in a semi-circle, I can use the facts I have established to solve related problems. MTH 4-17a I can apply my understanding of the properties of similar figures to solve problems involving length and area. MTH 4-17b I can plot and describe the position of a point on a 4-quadrant coordinate grid. MTH 4-18a I can apply my understanding of the 4-quadrant coordinate system to move, and describe the transformation of, a point or shape on a grid. MTH 4-18b Having investigated patterns in the environment, I can use appropriate mathematical vocabulary to discuss the rotational properties of shapes, pictures and patterns and can apply my understanding when completing or creating designs. MTH 4-19a
	Progression Through Fourth Level 
	Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level <ul style="list-style-type: none"> • I can describe rotational symmetry using appropriate mathematical vocabulary. • I can identify and discuss the rotational symmetry of shapes, pictures and patterns. • I can read and plot coordinates in all four quadrants. • I can identify, describe and represent the position of a shape following a translation. • I can identify when shapes are congruent or similar. • I can identify and use the scale factor to find a missing length. • I understand the relationship between the radius and tangent to a circle. • I can find missing angles and sides for similar shapes. • I can reflect or translate a point or shape on a grid. • I can complete pictures or patterns that have rotational symmetry. • I can create pictures with rotational symmetry. • I can identify, describe and represent the position of a shape following a translation on Cartesian Grid. • I have explored the effect of changing scale on area and can solve related problems. • I can calculate the angles in a semi-circle and solve related problems. • I can describe a transformation given a point or shape and its image on a grid. <ul style="list-style-type: none"> • Describes rotational properties of shapes, pictures and patterns including the order of rotation. • Uses knowledge of rotational symmetry to complete designs. • Uses a four-quadrant Cartesian grid to read and plot coordinates. • Applies understanding of translation to reflect or translate an object on a four-quadrant grid. • Uses similarity to find unknown lengths of 2D shapes. • Applies knowledge of the relationship between the tangent and radius to calculate sizes of missing angles. • Applies knowledge of triangles, angles, and circles, including semi-circles, to solve problems. • Identifies transformation by reflection or translation of a point or shape on a grid.

2D shape, circle, triangle, square, rectangle, star, straight, round, flat, curved, solid 3D object, cube, sphere, cone, cuboid, cylinder		circular, triangular, rectangular, pentagon, hexagon, octagon, semi-circle, pentagonal, hexagonal, octagonal, quadrilateral, diagonal, corner, diameter, radius, circumference, pair of compasses hemisphere, pyramid, prism, side, face, edge, corner, base, square base, angle				two dimensional, vertex, vertices, rhombus, equilateral/isosceles/scalene triangle, heptagon, polygon, kite, parallelogram, trapezium three-dimensional, vertex, vertices, nets, cylindrical, spherical, octahedron, dodecahedron, tetrahedron, polyhedron		
THIRD LEVEL		FOURTH LEVEL						
tangent, pi, arc, sector		Pythagoras, trigonometry, chord, sine, cosine, tangent, hypotenuse, opposite, adjacent, segment						

Curriculum Organiser	Shape, Position and Movement - Properties of 2D Shapes and 3D Objects	
Milestone/s	Awareness of 2D Shapes and 3D Objects	
EARLY LEVEL		
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I enjoy investigating objects and shapes and can sort, describe and be creative with them. MTH 0-16a</p>	
Progression Through Early Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> • I can name shapes in the world around me. • I can sort 2D objects. • I can sort 3D objects. • I can recognise and name a variety of 2D shapes. • I can recognise and name a variety of 3D shapes. 	<ul style="list-style-type: none"> • I can identify and match 2D shapes and 3D objects within the local environment. • I can recognise and name 3D objects - cube, cuboid, cylinder, sphere and cone. • I can describe 2D shapes. • I can sort 2D shapes and 3D objects into groups. • I can use the terms straight, round, flat, curved, rolls, stacks, solid to describe and sort 2D shapes and 3D objects. • I can talk about the difference between 2D and 3D. 	<ul style="list-style-type: none"> • Recognises, describes and sorts common 2D shapes and 3D objects according to various criteria, for example straight, round, flat and curved.

Curriculum Organiser	Shape, Position and Movement - Properties of 2D Shapes and 3D Objects		
Milestone/s	Properties of 2D Shape and 3D Objects		
FIRST LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I have explored simple 3D objects and 2D shapes and can identify, name and describe their features using appropriate vocabulary. MTH 1-16a</p> <p>I can explore and discuss how and why different shapes fit together and create a tiling pattern with them. MTH 1-16b</p>		
Progression Through First Level			Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> I can identify and name 2D shapes and 3D objects in different orientations and sizes. I can describe 2D shapes using the terms corners and sides. I can sort and classify common 2D shapes and everyday 3D objects. I can identify simple 2D shapes within 3D objects. I can describe 3D objects using faces, corners and sides. I can recognise 3D objects from 2D drawings. I can investigate 2D shapes that tile. I can identify examples of tiling in the environment. 	<ul style="list-style-type: none"> I can identify and name pentagons, hexagons and octagons. I can identify and name triangular prisms and square based pyramids. I can identify the composition of 3D objects using my knowledge of 2D shapes. I can recognise 3D objects from 2D drawings. I can measure the distance around the outside of simple 2D shapes using my knowledge of properties. I can create a tiling pattern with one or two 2D shapes. 	<ul style="list-style-type: none"> I can identify and name simple quadrilaterals, for example rhombus, kite and trapezium. I can describe 2D shapes using the terms edges and vertices. I can describe 3D objects using the terms faces, edges, vertices and base. I understand that the perimeter is the distance around the outside of a shape. I can measure the perimeter of 2D shapes. I can identify right angles in well-known 2D shapes. I can use a variety of 2D shapes to create a tiling pattern incorporating at least two different shapes. I can describe why some shapes tile and some do not. 	<ul style="list-style-type: none"> Names, identifies and classifies a range of simple 2D shapes and 3D objects and recognises these shapes in different orientations and sizes. Uses mathematical language to describe the properties of a range of common 2D shapes and 3D objects including, for example, side, face, edge, corner, base and angle. Identifies 2D shapes within 3D objects and recognises 3D objects from 2D drawings. Identifies examples of tiling in the environment and applies knowledge of the features of 2D shapes to create tiling patterns incorporating at least two different shapes.

Curriculum Organiser	Shape, Position and Movement - Properties of 2D Shapes and 3D Objects		
Milestone/s	Properties of 2D Shapes and 3D Objects; Using 2D Shapes and 3D Objects; Nets of 3D Objects; Representations of 2D Shapes and 3D Objects; Accurate Drawing of 2D Shapes; Circles		
SECOND LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>Having explored a range of 3D objects and 2D shapes, I can use mathematical language to describe their properties, and through investigation can discuss where and why particular shapes are used in the environment. MTH 2-16a</p> <p>Through practical activities, I can show my understanding of the relationship between 3D objects and their nets.</p> <p>MTH 2-16b</p>		
Progression Through Second Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level	
<ul style="list-style-type: none"> • I can name and identify properties of right angled and equilateral triangles. • I can name and classify 2D shapes and 3D objects and describe their properties using appropriate vocabulary including face, edge, vertex and angle. • I can identify a 3D object from a net. • I understand that a regular polygon is equiangular (all angles are equal in measure) and equilateral (all sides have the same length). <ul style="list-style-type: none"> • I can identify how and where 3D objects are used in the environment. 	<ul style="list-style-type: none"> • I can name and identify properties of right-angled, isosceles, equilateral and scalene triangles. • I can identify the parts of a circle including the terms radius, diameter and circumference. • I can create a net for a 3D object. • I can distinguish between regular and irregular polygons based on reasoning about equal sides and angles. 	<ul style="list-style-type: none"> • I can recognise and name common quadrilaterals and describe their properties. • I can understand the term diagonal and investigate the number of diagonals in a range of 2D shapes. <ul style="list-style-type: none"> • I can identify and describe 2D shapes and 3D objects within the environment and explains why their properties match their function, for example, the importance of triangles in a bridge structure. 	<ul style="list-style-type: none"> • Describes 3D objects and 2D shapes using specific vocabulary including face, edge, vertex, angle, diagonal, radius, diameter and circumference. Applies this knowledge to demonstrate understanding of the relationship between 3D objects and their nets. • Uses mathematical language to describe the properties of a wide range of regular and irregular 3D objects and 2D shapes. <ul style="list-style-type: none"> • Identifies and describes 2D shapes and 3D objects within the environment and explains why their properties match their function, for example, the importance of triangles in a bridge structure.

SECOND LEVEL		
Experience and Outcome for Planning Teaching, Learning and Assessment	I can draw 2D shapes and make representations of 3D objects using an appropriate range of methods and efficient use of resources. MTH 2-16c	
Progression Through Second Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> I know that the radius is half of the diameter and can use this knowledge to draw circles, using a pair of compasses. I can make use of digital technologies and mathematical instruments to draw 3D objects. I understand that there are instances when not all parts of the 3D object can be seen. 		<ul style="list-style-type: none"> Knows that the radius is half of the diameter. Uses digital technologies and mathematical instruments to draw 2D shapes and make representations of 3D objects, understanding that not all parts of the 3D object can be seen.

Curriculum Organiser	Shape, Position and Movement - Properties of 2D Shapes and 3D Objects	
Milestone/s	Accurate Drawing of 2D Shape; Circles	
THIRD LEVEL		
Experience and Outcome for Planning Teaching, Learning and Assessment	Having investigated a range of methods, I can accurately draw 2D shapes using appropriate mathematical instruments and methods. MTH 3-16a	
Progression Through Third Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level
<ul style="list-style-type: none"> I can use a variety of methods to accurately draw triangles and regular polygons (when given the interior angle), using mathematical instruments. I can use the formulae $r = \frac{1}{2}d$ and $d = 2r$ when calculating the radius and diameter and can use this as an accurate method of drawing a circle. 		<ul style="list-style-type: none"> Demonstrates a variety of methods to accurately draw 2D shapes, including triangles and regular polygons (given the interior angle), using mathematical instruments.

Curriculum Organiser	Shape, Position and Movement - Properties of 2D Shapes and 3D Objects		
Milestone/s	Formulae and Inter-Relationships within Triangles; Circles;		
FOURTH LEVEL			
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I have explored the relationships that exist between the sides, or sides and angles, in right-angled triangles and can select and use an appropriate strategy to solve related problems, interpreting my answer for the context. MTH 4-16a</p> <p>Having investigated the relationships between the radius, diameter, circumference and area of a circle, I can apply my knowledge to solve related problems. MTH 4-16b</p>		
Progression Through Fourth Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level	
<ul style="list-style-type: none"> • I have investigated and can use the Theorem of Pythagoras for calculating the length of any side in a right-angled triangle. • I can calculate the length of any side in a right-angled triangle using trigonometry. • I can find missing angles in a right-angled triangle using trigonometry. • I know and correctly use the formulae $C = \pi d$ and $A = \pi r^2$. • I have investigated and can use the relationship between the radius, diameter and circumference of a circle to solve related problems. • I have investigated and can use the relationship between the radius and area of a circle to solve related problems. 		<ul style="list-style-type: none"> • I can solve problems using the Theorem of Pythagoras and trigonometry, including coordinate systems. • I can correctly choose between trigonometry and Pythagoras to solve problems in real life contexts. • I can solve related problems for compound shapes including parts of circles. • I can find radius/diameter when either area/circumference is given. 	<ul style="list-style-type: none"> • Calculates the length of any side of a right-angled triangle using the Theorem of Pythagoras. • Calculates the size of an angle in a right-angled triangle using trigonometry. • Calculates the length of a side in a right-angled triangle using trigonometry. • Uses the formula $C = \pi d$ or $C = 2\pi r$ to calculate the circumference of a circle. • Uses the formula $A = \pi r^2$ to calculate the area of a circle. • Calculates diameter and radius of a circle when given the area or circumference.

Milestone/s						
EARLY LEVEL						
No Experiences and Outcomes at Early Level						
Curriculum Organiser	Number, Money and Measure - Mathematics and its Impact on the World, Past, Present and Future					
Milestone/s	Mathematics in the Environment; Numbers through History; Uses of Mathematics					
FIRST LEVEL						
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I have discussed the important part that numbers play in the world and explored a variety of systems that have been used by civilisations throughout history to record numbers.</p> <p>MTH 1-12a</p>					
Progression Through First Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level				
<ul style="list-style-type: none"> • I can describe a variety of ways in which I have used number in real life. • I can investigate some number systems which have been used by civilisations throughout history to record numbers. • I can share my understanding of a system that has been used by civilisations throughout history to record numbers, for example Early Humans, Egyptians, Roman Numerals. 		<ul style="list-style-type: none"> • Investigates and shares understanding of the importance of numbers in learning, life and work. • Investigates and shares understanding of a variety of number systems used throughout history. 				
SECOND LEVEL						
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I have worked with others to explore, and present our findings on, how mathematics impacts on the world and the important part it has played in advances and inventions.</p> <p>MTH 2-12a</p>					
Progression Through Second Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level				
<ul style="list-style-type: none"> • I can research ways in which mathematics has played an important role in advancing our world of work, for example in the construction industry and ways in which numeracy and mathematics equips learners with skills for life and work. • I have researched jobs/careers where mathematics plays an important part, including STEM subjects and arts and business. • I can research ways in which mathematics has played an important role in advancing inventions now and in the past, for example exploring the binary number system. 		<ul style="list-style-type: none"> • Researches and presents examples of the impact mathematics has in the world of life and work, for example, the use of triangles in construction. • Contributes to discussions on the role of mathematics in the creation of important inventions, now and in the past. 				

Curriculum Organiser	Number, Money and Measure - Mathematics and its Impact on the World, Past, Present and Future				
Milestone/s	Famous Mathematicians				
THIRD LEVEL					
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I have worked with others to research a famous mathematician and the work they are known for, or investigated a mathematical topic, and have prepared and delivered a short presentation.</p> <p>MTH 3-12a</p>				
Progression Through Third Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level			
<ul style="list-style-type: none"> • I can choose and research famous mathematicians and the work they were known for, and share this research with others, for example Archimedes, Pythagoras, Hypatia, Leibniz, Newton, Gauss, Mandelbrot. • I can choose and research a mathematical topic with others and present my findings. 		<ul style="list-style-type: none"> • Researches and communicates using appropriate mathematical vocabulary and notation, the work of a famous mathematician or a mathematical topic and explains the relevance and impact they have on society. 			
Curriculum Organiser	Number, Money and Measure - Mathematics and its Impact on the World, Past, Present and Future				
Milestone/s	Famous Mathematicians				
FOURTH LEVEL					
Experience and Outcome for Planning Teaching, Learning and Assessment	<p>I have discussed the importance of mathematics in the real world, investigated the mathematical skills required for different career paths and delivered, with others, a presentation on how mathematics can be applied in the workplace.</p> <p>MTH 4-12a</p>				
Progression Through Fourth Level		Benchmarks to Support Teachers' Professional Judgement of Achievement of a Level			
<ul style="list-style-type: none"> • I have worked with others to investigate the role mathematics plays in the workplace and can deliver, with others, a presentation using appropriate technology. • I have investigated the mathematical skills required for a range of careers including those in STEM subjects. 		<ul style="list-style-type: none"> • Contributes to discussions and presentations on the role of mathematics in everyday life and in the workplace. • Investigates the mathematical skills required for a range of careers, including those in STEM subjects.
