

Book Creator Workshop

Let's make an eBook!

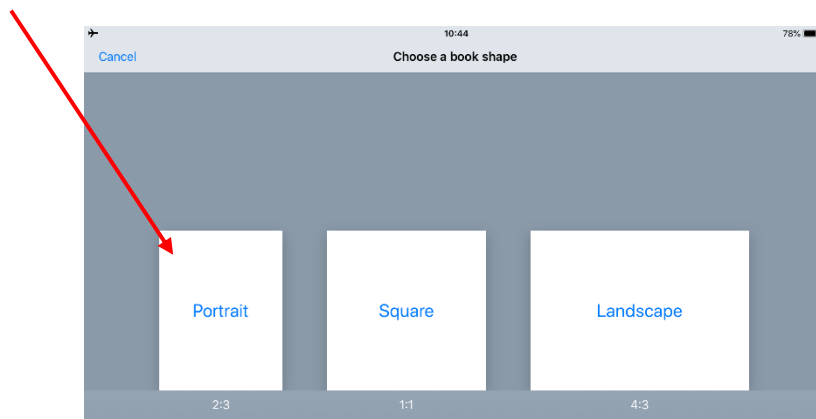

In this workshop, we're going to look at an eBook that can contain photos, videos, text, drawings and sound. To get started, find the "Book Creator" app on your iPad, then tap it to open it:

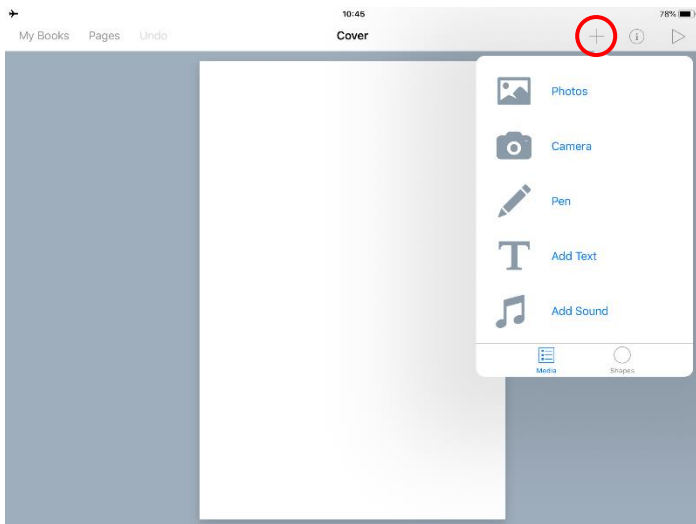

Once you've opened Book Creator, let's start a new book:

You can choose a book layout that you like; in this example, I'm going to use "Portrait":

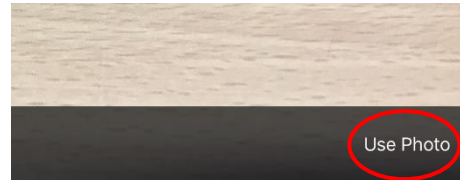

Now we're presented with a blank page. So, let's click the + and see what we can add to this page to make it better.

Select "Camera", and the iPad's camera will open.

Take a photo, and then click "Use Photo" in the bottom-right camera to add it to your page.

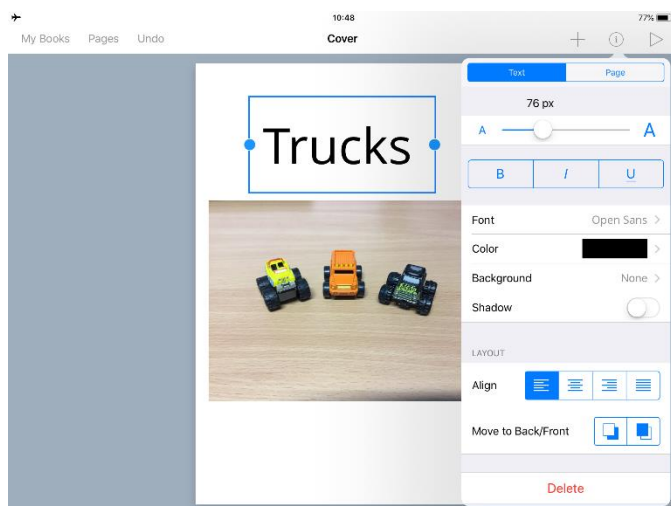

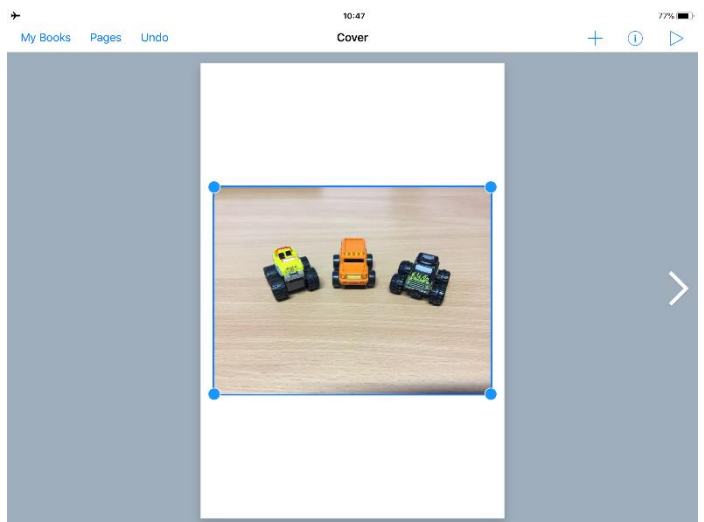

Resize the image by using the blue dots at each corner.

Rotate the image by placing two fingers on it and spinning it around.

Move the image by dragging it around.

You can also **delete** the image by tapping the ⓘ button next to the + and selecting "Delete".

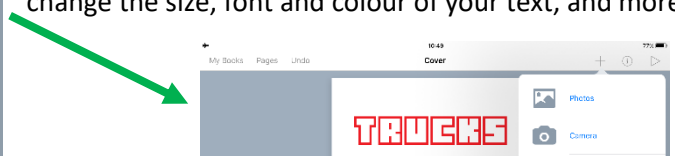

Lastly, you can access additional options by pressing and holding the image: Cut, Copy, Paste and Lock/Unlock.

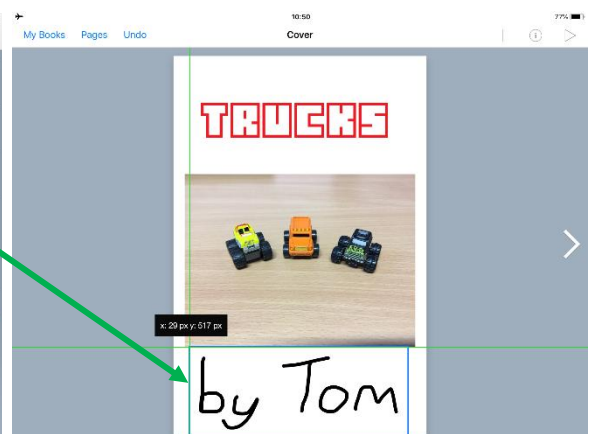

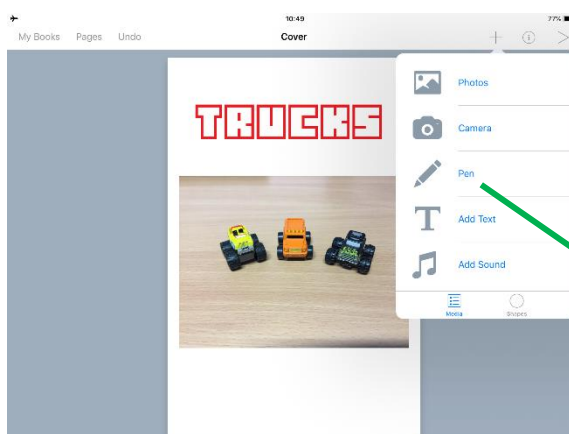

Now let's add a title. Tap ⓘ again, but, this time, choose **Add Text**. Then, enter a title for your book in the box.

You can **resize**, **rotate** and **move** this text in just the same way as images.

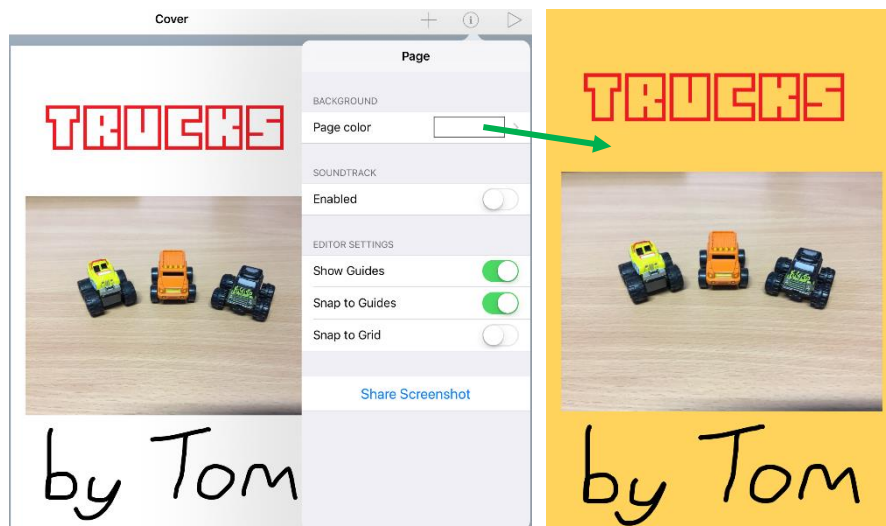

While you have your text selected, you can tap ⓘ and change the size, font and colour of your text, and more!

You can also add some writing or drawing of your own by using the **Pen**:

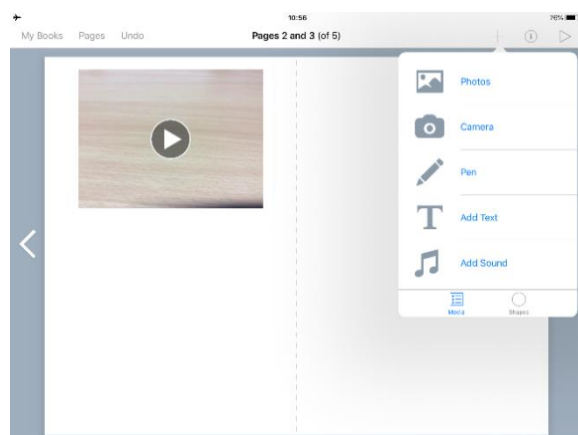

You can also change the colour of your page! To do so, click the  and choose **Page color**.

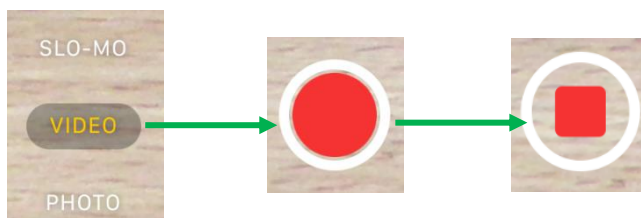

Once you're ready to start making the **next page**, click the  arrow on the right-hand side of the screen. You'll then see a blank page. You can customise this page however you want, but [read on to find out what else you can do!](#)

How to add videos

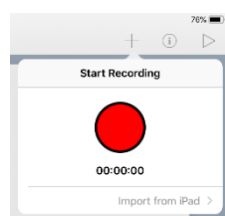

To add a video, tap the + and select **Camera**. Once in the camera, you can switch to **Video**.

Press the red button to record, and press it again to stop recording. Then, select "Use Video" to add it to your page.

How to add sound

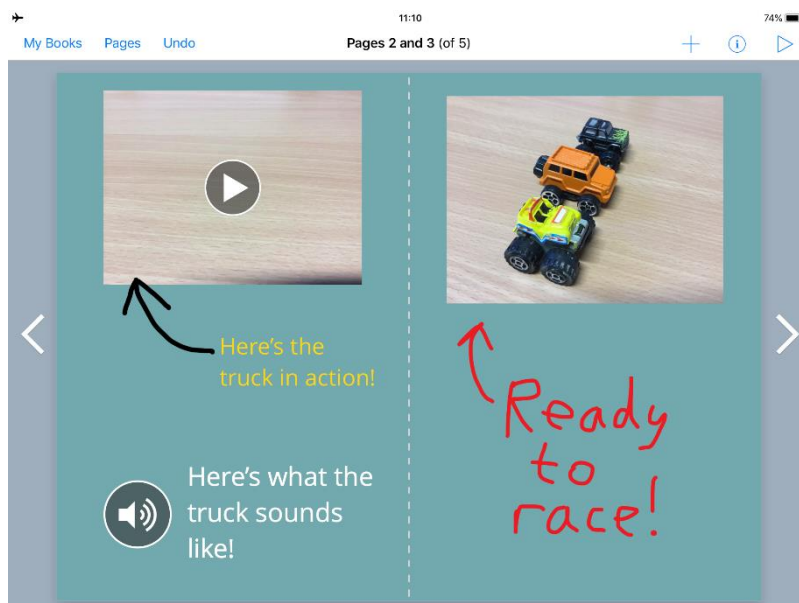

To add sound, tap the + and choose **Add Sound**. Tap the red button to start recording, and tap it again to stop recording – just the same as recording a video above!

Once you've added your sound, it will appear as a picture of a speaker, which you can move around and resize.

I've added some **sound**, a **video**, different coloured **text**, a different coloured **background**, a **photo** and some drawings and writings with the **pen**, so now mine looks like this:

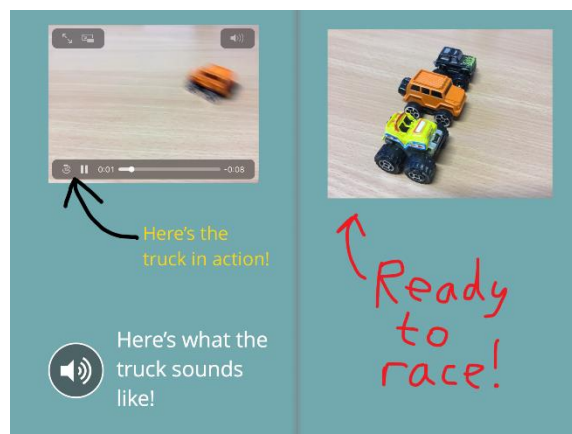

See if you can add at least one of each type of media to your page: **Photo**, **Video**, **Pen**, **Text** and **Sound**!

Once you've finished, you can see what your creation looks like as an eBook by tapping the ▶ button in the top-right corner.

This lets you see all your hard work and read your eBook!

You can change pages by swiping left and right:

Now you've made an eBook – well done! See if you can add more pages and content to it, or even make another!
