

Jelly bags

Equipment

- **Strong plastic ziplock bags**
- **Some jelly which has been made up and left to set**
- **Strong sticky tape**

Instructions

Mix up the jelly and place some into each bag, leaving enough room in the bag so the jelly can move.

Seal the bag and secure the top with the sticky tape. Check there are no leaks, and then it's ready to play with.

Variations

If you don't have jelly, just put some plain or coloured water into the bag with glitter if you have some.

Precaution

Make sure there are no leaks in the bags, and the play should be supervised at all times in case younger children bite them.

benefits

- Physical – developing hand/eye coordination and hand skills.
- Other – experimenting with textures and shapes and developing creativity and imagination. Encouraging concentration.
