

Breakdown the task	Beginning to play/tinker with Scratch Jr	Tinkering, persevering, debugging	Exploring and delving deep to create
Add a background 	Choose a background from the gallery	Draw your own background. Tick to add to your project.	Tinker with the camera tool and begin to draw upon images you take. This tool can be a bit fiddly at first but persevere and you will get there.
Add characters 	Use Scratch Cat – the orange cat that is already there OR Click on the paintbrush to paint a costume on the cat  OR click on + character and choose one from the gallery	Click on + add character and the paintbrush and draw your own.  Tinker with all the tools Persevere until you have created the best characters you can.	Tinker with the camera option. Photograph yourself into one of the blank face templates Photograph yourself and draw on top to give yourself an Easter costume Online safety – remember that if you are sharing online you need to have permission from your parents to share a card with your face on it.

Breakdown the task

Beginning to play/tinker with Scratch Jr

Order code blocks to create an algorithm –
a set of instructions that are followed in order

Start with the green flag

Add blue blocks for movement

Can you make your character move across the screen?
Can you make them jump or turn?

Tinkering, persevering, debugging

Could you make 2 characters move together?

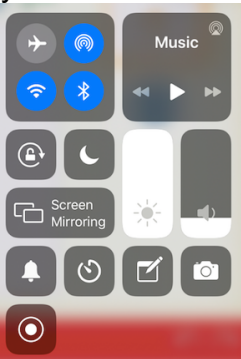

Each character will need a set of blocks.
Could they grow, shrink, disappear and reappear.

Exploring and delving deep

Can you choose blocks to create a dance for each of your characters that **repeats**.
