

**BIG THURSDAY!**

9.40am **Computer Science**

Choose one from the following:

Create a stop motion animation (phone camera or download an app – Miss Stapleton makes suggestions on the blog) about working at home. Use characters you have drawn and cut out if you don't have Lego or Playdoh at home.

Or

Download Audacity (Miss Stapleton tells you how to on the blog) plan and record your own podcast about home learning. Try to include interviews with your family members – have questions ready to ask them.

Or

Sketchup - (free to download) draw a 3D image of your house or draw your dream house and bedroom.

10.30am – Breaktime

11am STEM – Outdoor

Create the tallest free standing (no holding it up!) tower out of items you find at home. You must put everything back when you are finished with it.

Indoors – it must sit on the floor and touch the ceiling of the room.

Outdoors - it must be at least 3m high.

You must take a photo to evidence your tower and post it on the blog. Now tidy up!

12.15pm Lunch time

### 1pm Art – illustrators

Choose a favourite book; create some new illustrations for it. You could choose your 3 main events or your 2 favourite parts.

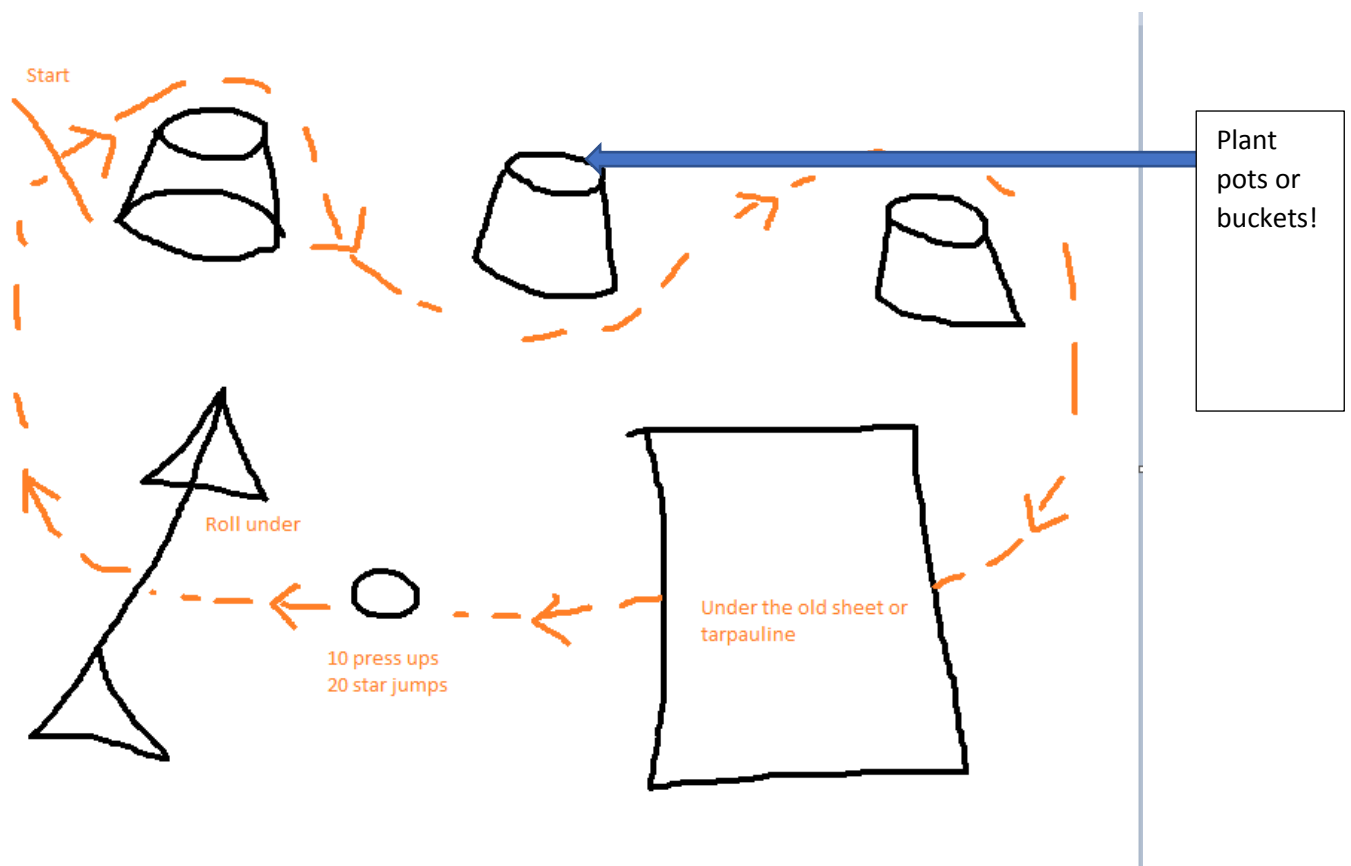

You could choose from one of the artists Mrs Jardine taught you about. (NO COPYING from the internet!)

2pm PE - Create a military style obstacle course in your garden. Time how many times you can complete it in 1 min.

How can you make it more difficult?

Can family members have a go?

Here's one I designed earlier...

REMEMBER to tidy up when you are finished!

3pm Home time!!
