Time:

Make your own clock :

I used old notebook covers (recycling!!)

Make sure you have a long minute hand and a short hour hand.

I used a bowl to draw around for the clock face.

I used a pencil to hold my hands on my face.

Practise drawing clock faces on your white board:

It is important to make sure the numbers are in the correct place on the clock face.

Now parents set the clock and child reads it :   6 o'clock   3 o'clock   12 o'clock

Now parents tell and pupils set the clock: 7   **o'clock**   1 o'clock etc.

Now try **half past**, **quarter to** and **quarter past**.

Hickory Dickory, Clock http://www.ictgames.com/mobilePage/hickoryDickory/index.html

Little and often—use your clock everyday for 5 minutes.

Big Maths Challenge:

Try and complete one column of questions each day this week.

Read the signs - + carefully!!

Repeated Addition:

Keep Practising at home (look up lasts weeks grid for all the information)

2+2+2+2+2+2+2+2=

5+5+5+5+5+5+5=

10+10+10+10+10+10+10+10=

Holywood Maths Homework:

Keep using the Homework Options: great for skills practice. Great for mental maths—a little everyday = no rusty brain!!

Sumdog

Hit the button

Target Board

10	60	50	200
80	20	0	30
100	40	90	70

Choose a different target task each day this week:

1.   Put all the numbers on order. Start with the smallest.

2.   Rewrite each row putting the numbers in order from the smallest (then from the largest to smallest)

3.   Add 10 to each number.

4.   Double each number. (Remember if you know double 2, you know double 20 and double 200 - look for a pattern)

5.   Write down all the odd numbers (Can't share equally between 2 people—chunk in 10s)

6.   Write down all the even numbers (Can share equally between 2 people—chunk in 10s)

7.   What number must be added to each number to make 100? (200 sits out!)

8.   Add one to each number.

9.   Take one away from each number.

10.   Take 10 away from each number (zero sits out!)
