

THE 4 in space

Chapter 1: The Dust

It was on one sunny Saturday morning where Jake and his friends built a model rocket out of cardboard.

"Yo we need more tin foil!" said Sam one of Jake's friends. "I'll go and tell granddad!" So Jake went inside to tell his granddad. "Granddad can we have more tin foil?" "Go check in the attic I think there is more in there!" replied Jake's granddad. There for Jake went up to the attic and found the tin foil but he saw a strange glow at the back of the attic. He drew nearer and nearer it was some old dust but it was glowing. So he brought both of the things down and said to his granddad "Granddad what is this?" "That is my old dust and when you use it it can turn your life upside down." Jake went outside and put it on the exhaust of the rocket. They just finished the model they

Sat in and pretended to be astronauts.

Chapter 2 Space

About 3 minutes later the model started to shake.

"I'll go and check it out" said Jake. The back of the rocket turned real!! "Whats going on!" shouted

Jack pretending to fly it from the model. In about

30 seconds the whole rocket was real!! they didnt tell

his granddad because he might be suspicious.

"Lets go to space boys!" said Jake

so they got their suits on and headed to

space

Chapter 3 the countdown

They just got out of the Earths atmosphere

now there in space they could see everything the sun

Mercury, Venus, Earth (where they came from), Mars, Jupiter,

the beautiful Saturn, Uranus (ha ha ha) and the blue giant,

Neptune also they could see the remains of Pluto.

"Sweet mother of monkey milk were here!" said Nathan. The first planet they visited was Mars. It took them approximately 20 minutes to get there. Then they landed. They breathed the hot Mars air and walked off. About half an hour later they found a gigantic hole and a timer. It was counting down. They heard a rumble in the hole. They drew closer and closer and it was ticking down and they had 11 days 4 hours and 3 minutes.

Chapter 4 The hole.

"Lets go check it out" said Jake. They went down the spiral stair case and suddenly they stopped. There was a guard and it was an alien!!! they all slid up against the wall and kept silent.

"Don't move a muscle and we need to think strategically about this this, an alien for heavens sake!" said Sam being very serious.

They jumped as high as they could and knocked out the 'alien. Right' their in. They saw a rocket with puffing smoke coming out of it. They snuck down even more knocked out more aliens they got down to the control modul. Holy moly was there loads of buttons red ones, blue ones, orange ones and green ones. But then BEEP, BEEP BEEP! it was an alarm going off. It was shouting Intruder! Intruder! all the aliens assembled with their plasma guns aimed at them!

Chapter 5 The Prison Cell.

They were locked up laser bars, stuffy beds and a stubby toilet. 3 days no food no drink. just pure friendship. Rock paper scissors for half of the day then comedy for the next. Its been a week since they've been locked up it the all. Down on Earth its been a whole year since they've been missing

and sadly Jake's granddad had passed on⁵
but Jake does not know about it finally they were
called to see the chief. They spoke for at
least an hour and finally they were free!!

Chapter 6 Earth.

So they stopped the countdown and stopped
their evil plans. So they provided them with
a rocket ship and soon enough they were back
on Earth. Jake dropped off his friends and when
he went to his granddad's house there was construction
workers, detectives and police all around the house.

Chapter 7 The End

3 months later he was living with his mum
and living a normal life without his dad
and he still went to school with his
friends but he never told anyone his secret.

Just four normal people
from a normal town with
a normal life but that will
all turn around!!!
