# MY SPACE Story

On Friday the 2<sup>nd</sup> of March 1822 I woke up in my bed and my dog Baz was hiding under my covers. When I went down stairs my mum Liz was sitting at the table with my dad Neil. My brother Jim who was only 4 years old who was so scared because the house was shaking back and forth. We were all really scared! After a few hours the house began to float up into space.

When my dad realized you can't breathe when you're in space without space kit. After we were up really high we saw an Alien on Mars.

When we landed the Alien gave us some space kit my dad didn't know what to say because the Alien was speaking a different language!

My dad gave each of us the suit and jumped on the house to try to get it down.

and it worked but our dog Baz who was still under the covers he was being sick so my dad had to go back up to space with his gears and saw the Alien again. my dad put on the space suit to try and make Baz feel better and my mum was in the house with Jim because Jim wasn't feeling good. Mum can you read me a book?

No dear!

Why not?

because I have to do some house work!

OK. so while dad was helping our dog I was having a look around news. When I saw the Alien I wanted to make friends with him because he smiled at me. Even though I had to do sigh languings but he was a good friend to have. Meanwhile my dog baz felt

a lot better. So my dad went into the house  
to see what was going on. Then he put the fire on  
because it was very cold in space. My dad said that!  
dad can YOU read me a book?

of course!

Mum was sitting next to the fire because she was cold.

Baz finally stopped being sick and came inside.

Then sat next to the fire my dad started the engine and

We put our space kit on Baz so he can breathe.

We started to float back down and finally we  
came close to earth and we took our space kit  
off and took Baz's off. I was so pleased

because I was sick of space. When we  
landed I went straight out of the house  
and into the garden. Then I came  
into the house and went to bed.
