The Spacecraft

Once upon a time there was a man called Hunter. He was determined to go to space but he did not know how to get there. One lovely day he went to NASA he was looking around when something caught his eye it was the first part of the space-craft. He felt very inspired to go to space now. He decided that he would go and get an amazing book on Tim Peck.

The next week he went back to give the book back the man in the library said I guess you are in to space. Yes said Hunter I would love to go there someday. The next month later Hunter thought to himself that he was going to do it he knew he would. So he decided that he would go and get some supplies from the shop because he wanted to try stay in a big space before he started the space training. He knew that he had a small attic so he could try stay up there for a few nights. So that he knew how tight it would be up in space. He thought it would be quite fun so he went up but after a few days it was really boring but he knew space would be so much more fun.

A few weeks later Hunter knew it was time to get his thinking head on. So he said to his friend its time I know it is. So Hunter and his friend went to NASA again they built their spacecraft with NASA. And then they had to go through two years of space training and then Hunter and his friend were ready they got in got there stuff in and were ready they heard the launch go

~~THE MIX TAPE RILLS~~

This story ^{sort of} takes place in the ^{1980s} in-
~~Georgia~~ Georgia back when it was dull and crime
was running wild. While all this was
happening there was a corner of crime so bad
only 100 people lived there. there was so
many chemists with illegal stuff and people after
a while started stealing their prescriptions
everyday. but that's aside

lets get on with ~~chapter~~ ↓

chapter 1

where this story actually takes place in
space 2087 we've had to make living on
Mars 20 ~~doable~~ doable. so we had to make
spacesuits in every size imaginable
some people just have one job and its
to find out cures for the Mars 7 ice infection

and every body else works for me the President
we only just moved because every thing on
earth got destroyed by Thanos the god of war
the Avenger stoped his minions barely
the final battle took place in Wakanda where
half of earths population ^{died} in the click of
a fingers. he said and i quote should of gone
for the HAA D \ ^{Minecraft} theme song
Plays \ So thats why we live here now.
on other ^{Notes} we just found Rainbow Titanium
the new cure for the Mars Zice infection.
only about 0.002% of people have it. Its the
equivalent of the cold though.
