

I can use a variety of methods to solve number problems in familiar contexts, clearly communicating my processes and solutions. MNU 3-03a  
 I can continue to recall number facts quickly and use them accurately when making calculations. MNU 3-03b

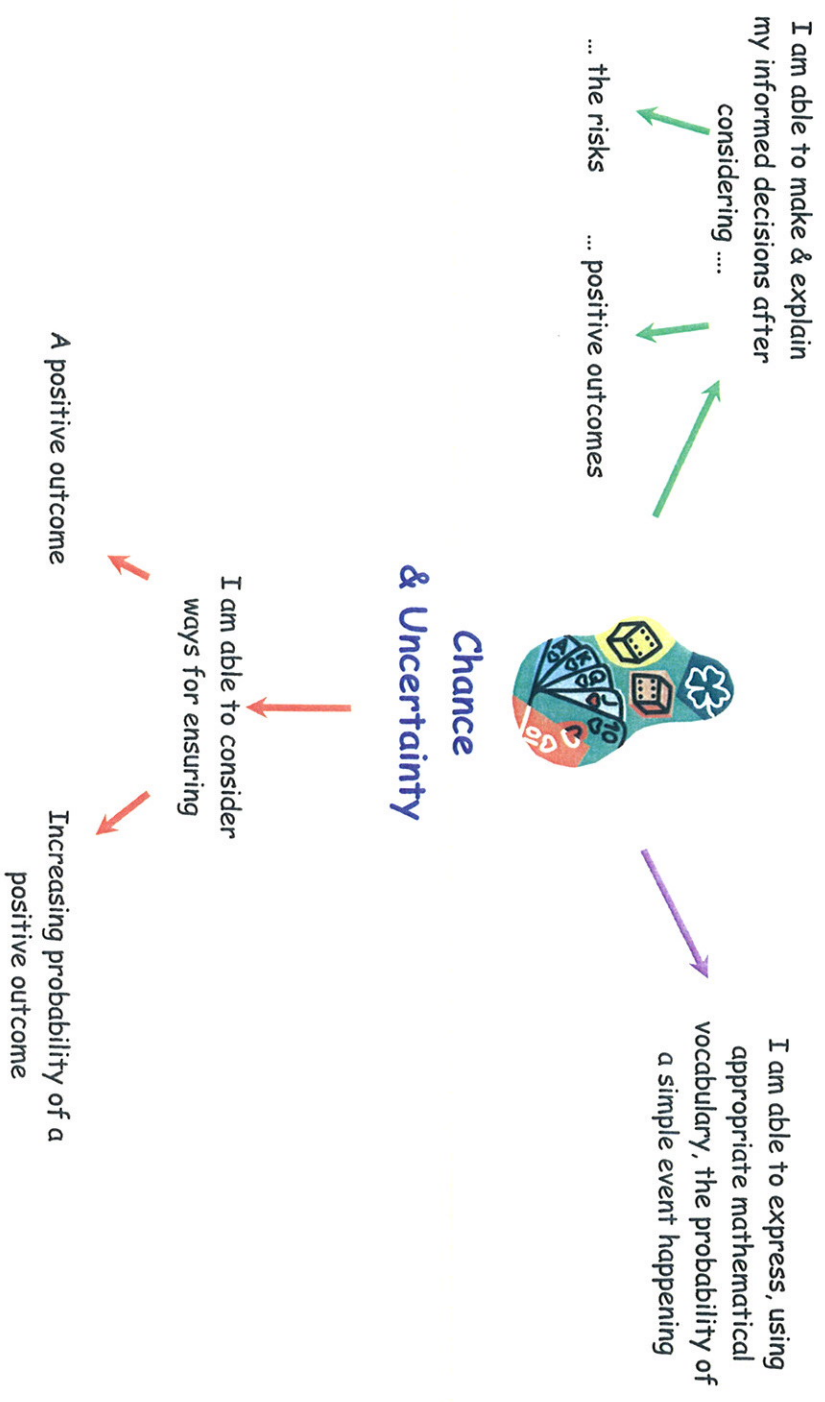

I can name angles and find their sizes using my knowledge of the properties of a range of 2D shapes and the angle properties associated with intersecting and parallel lines. **MTH 3-17a**  
 Having investigated navigation in the world, I can apply my understanding of bearings and scale to interpret maps and plans and create accurate plans, and scale drawings of routes and journeys. **MTH 3-17b**  
 I can apply my understanding of scale when enlarging or reducing pictures and shapes, using different methods, including technology. **MTH 3-17c**

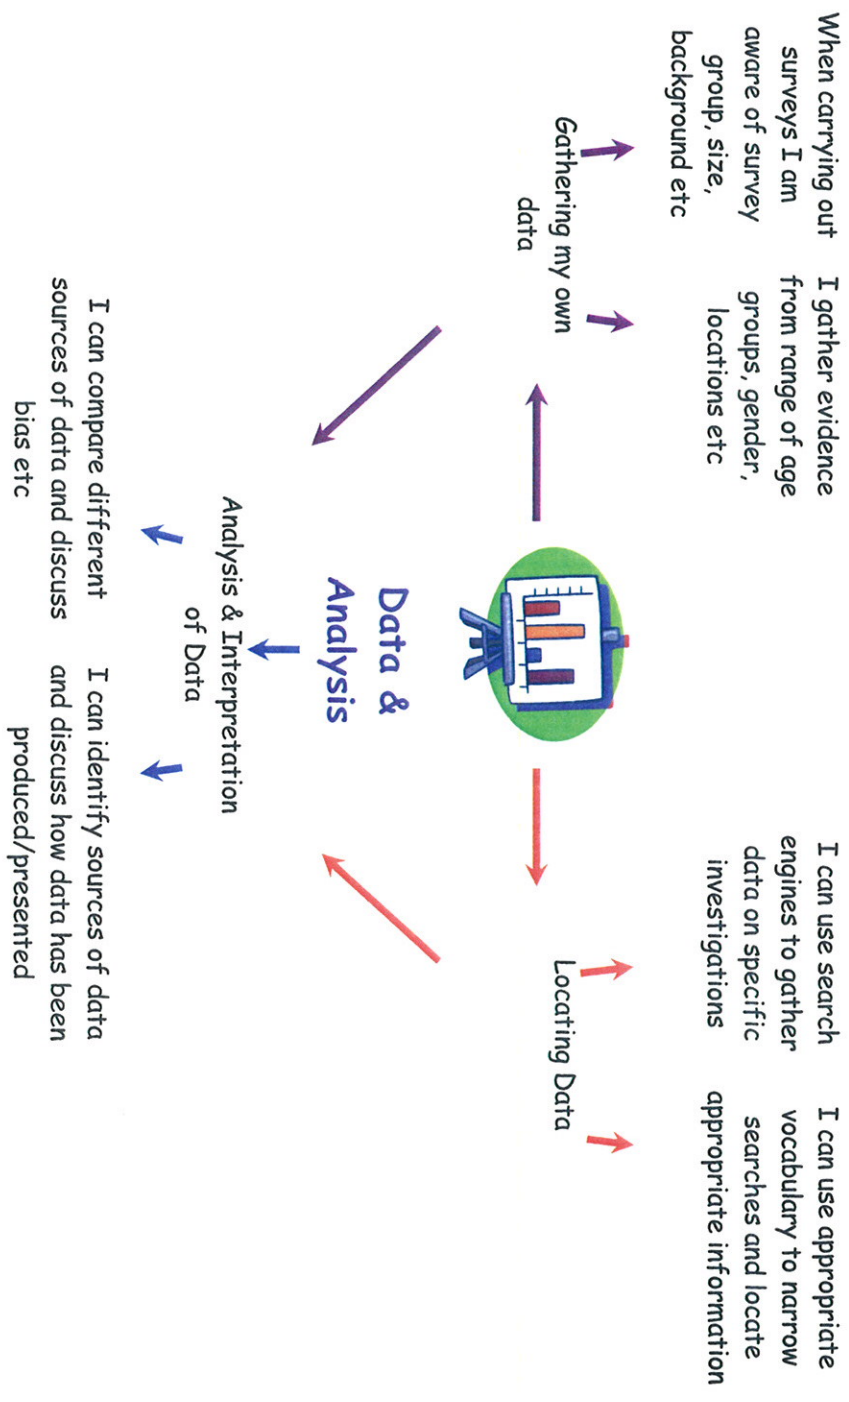

I can find the probability of a simple event happening and explain why the consequences of the event, as well as its probability, should be considered when making choices.  
MNU 3-22a

I can work collaboratively, making appropriate use of technology, to source information presented in a range of ways, interpret what it conveys and discuss whether I believe the information to be robust, vague or misleading. **MNU 3-20a**  
 When analysing information or collecting data of my own, I can use my understanding of how sample size and bias can affect the reliability of data being gathered, to check or ensure that the results are unprejudiced. **MTH 3-20b**  
 I can display data in a clear way using a suitable scale, by choosing appropriately from an extended range of tables, charts, diagrams and graphs, making effective use of technology. **MTH 2-21a / MTH 3-21a**

I can round a number using an appropriate degree of accuracy, having taken into account the context of the problem.  
MNU 3-01a

Whole  
Tenth  
Hundredth  
Thousandth  
1st significant no.  
2nd significant no.

I am able to round a number to the nearest

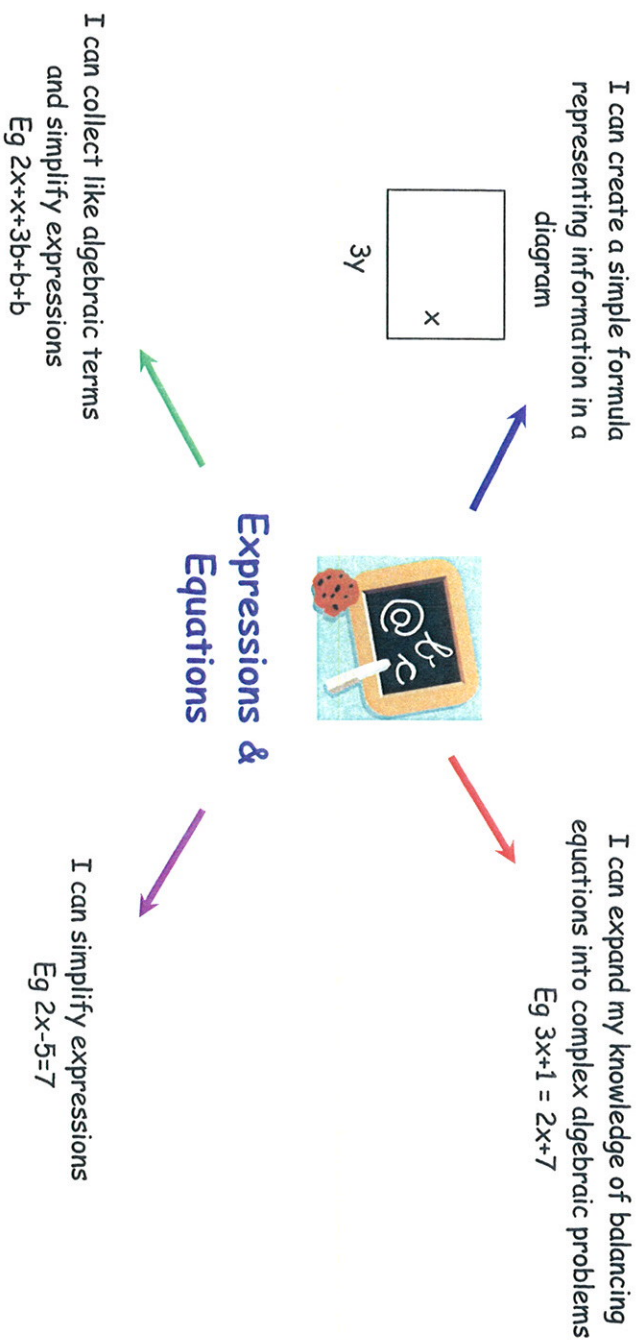

I am able to assess the degree of accuracy required of my answer in relation to the event/situation being measured

### Estimation & Rounding

I can estimate mentally using various strategies which I am confident in using

I can collect like algebraic terms, simplify expressions and evaluate using substitution. MTH 3-14a  
Having discussed ways to express problems or statements using mathematical language, I can construct, and use appropriate methods to solve, a range of simple equations. MTH 3-15a  
I can create and evaluate a simple formula representing information contained in a diagram, problem or statement. MTH 3-15b

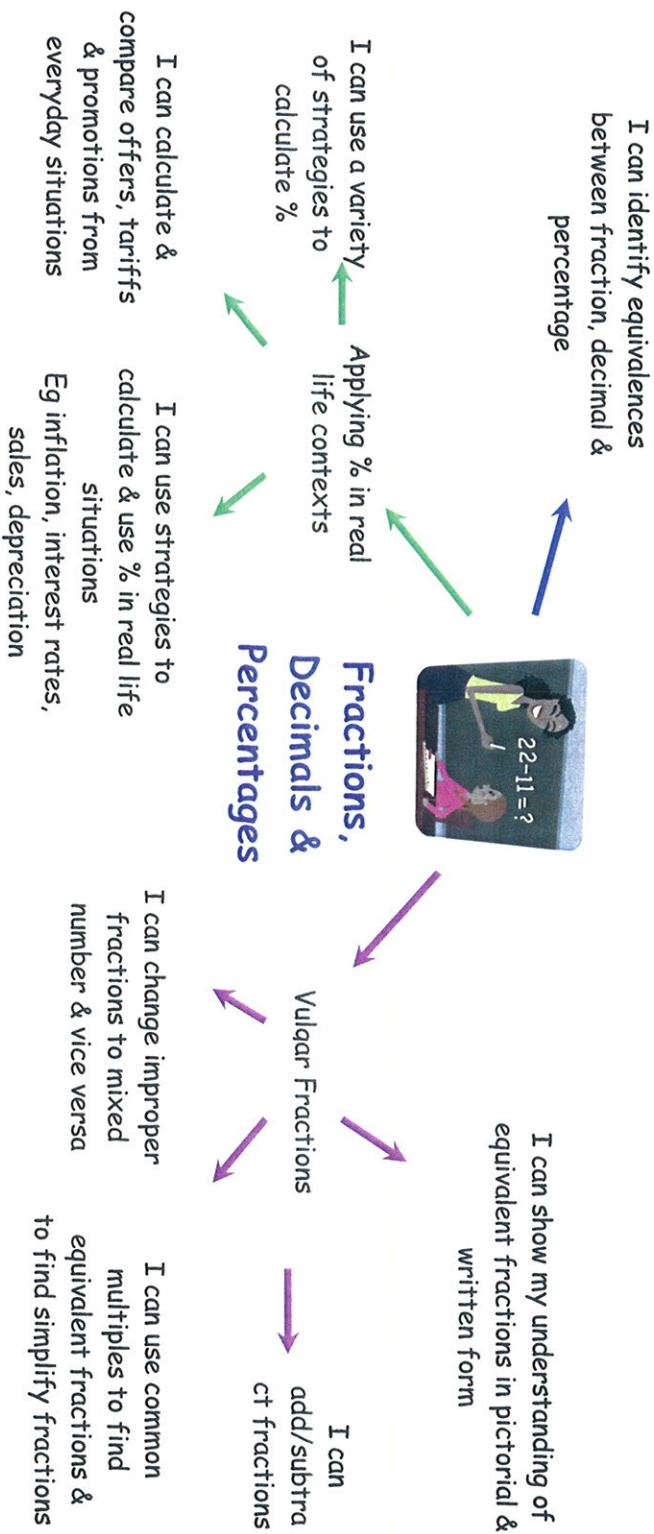

I can solve problems by carrying out calculations with a wide range of fractions, decimal fractions and percentages, using my answers to make comparisons and informed choices for real life situations. **MNU 3-07a**

By applying my knowledge of equivalent fractions and common multiples, I can add and subtract commonly used fractions. **MTH 3-07b**

Having used practical, pictorial and written methods to develop my understanding, I can convert between whole or mixed numbers and fractions. **MTH 3-07c**

I have worked with others to research a famous mathematician and the work they are known for, or investigated a mathematical topic, and have prepared and delivered a short presentation. MTH 3-12a

Virtually Yours in Maths—Famous Mathematicians  
[www.ncsu.edu/midlink/vy/vymath.htm](http://www.ncsu.edu/midlink/vy/vymath.htm)

**Impact on the  
world, past,  
present & future**

I can research &  
deliver a short  
presentation on  
discoveries in  
maths

Archimedes  
Fibonacci  
Pascal  
Pythagoras  
Babbage  
Descartes  
Lovellace  
Banneker

I can create a presentation  
on a mathematical topic of  
personal interest for my  
class

I can solve practical problems by applying my knowledge of measure, choosing the appropriate units and degree of accuracy for the task and using a formula to calculate area or volume when required. **MNU 3-11a**  
Having investigated different routes to a solution, I can find the area of compound 2D shapes and the volume of compound 3D objects, applying my knowledge to solve practical problems. **MTH 3-11b**

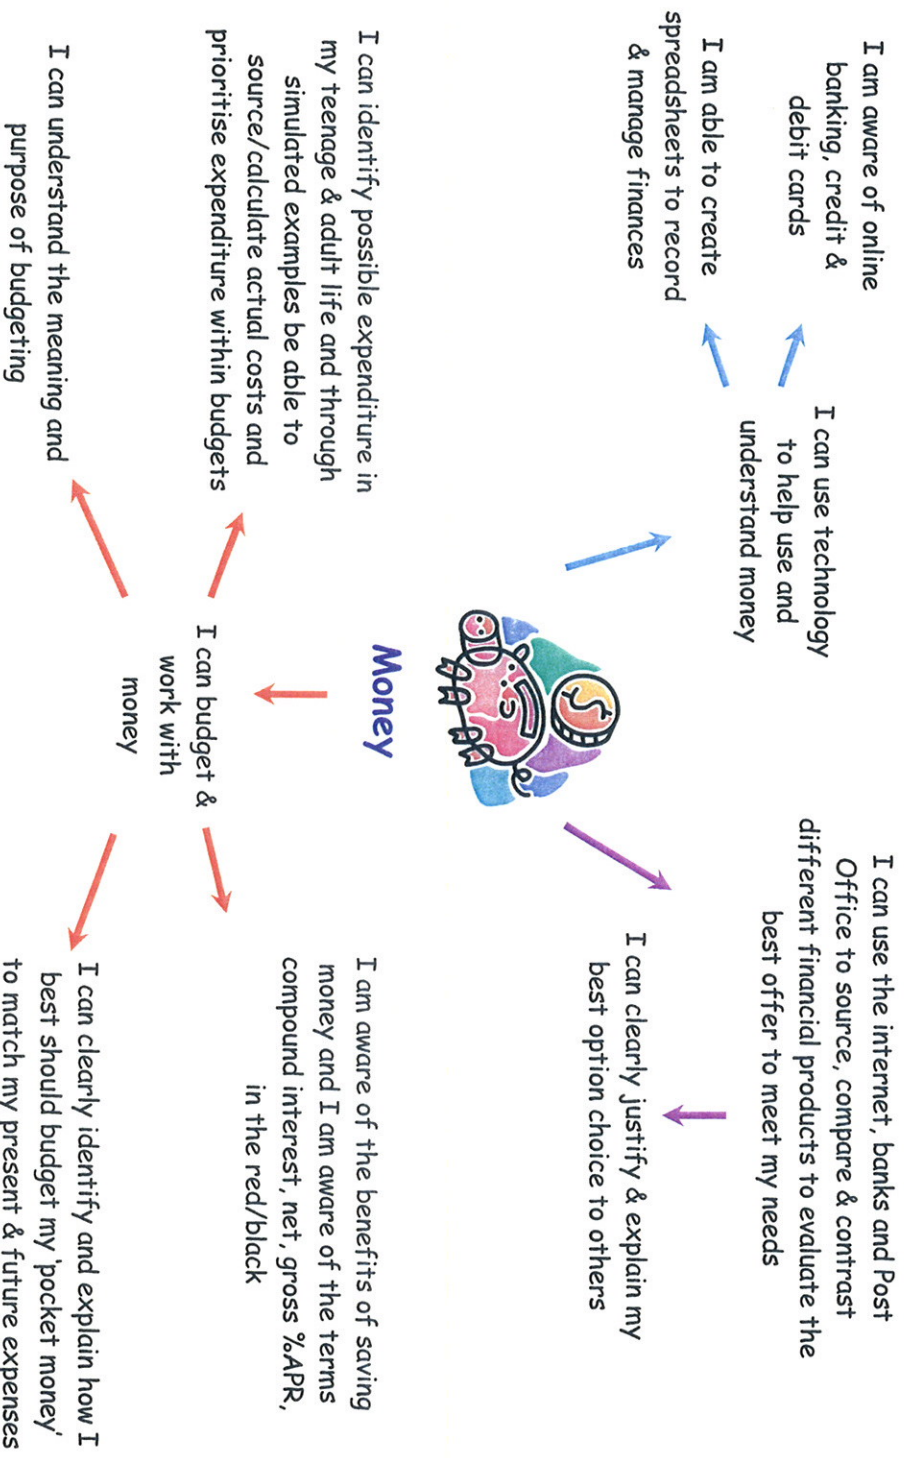

I When considering how to spend my money, I can source, compare and contrast different contracts and services, discuss their advantages and disadvantages, and explain which offer best value to me. **MNU 3-09a**

I can budget effectively, making use of technology and other methods, to manage money and plan for future expenses.

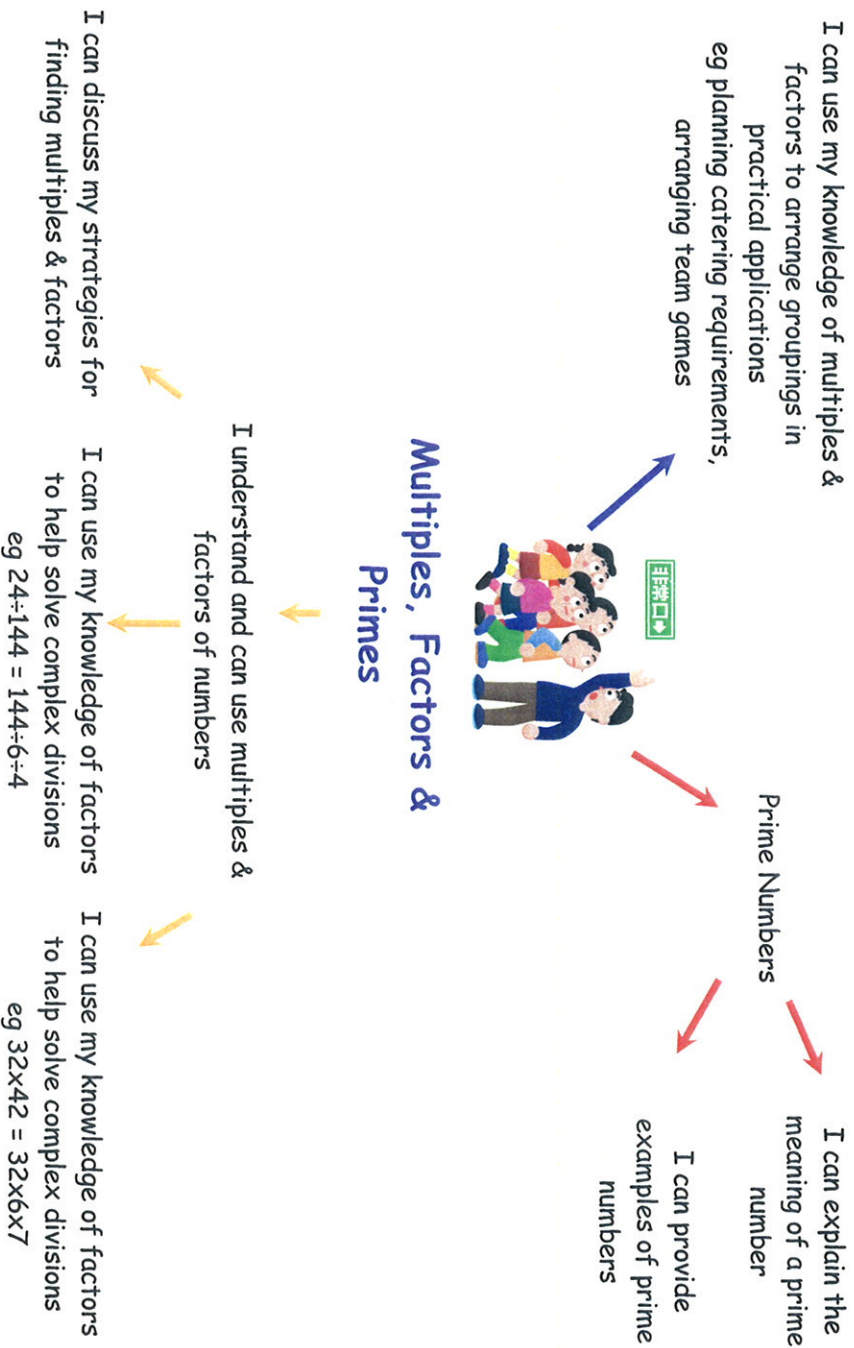

**MNU 3-09b**

I have investigated strategies for identifying common multiples and common factors, explaining my ideas to others, and can apply my understanding to solve related problems. MTH 3-05a

I can apply my understanding of factors to investigate and identify when a number is prime and can explore and explain the application of prime numbers in today's world. MTH 3-05b

I can use my understanding of numbers less than zero to solve simple problems in context.  
ANNU 3-04a

I can use my understanding of debt and profit in business and in personal savings to calculate changing balances across the zero

I am aware of examples of the use of negative numbers in measuring temperature and can identify and calculate the rise and fall in degrees between temperatures passing through zero degrees

## Negative Numbers

I can extend my knowledge of co-ordinates location to the negative x and negative y axis

I am able to calculate simple algebraic problems with and understanding of negative and positive numbers

Eg  $-2-3=$   
 $3-(-4)=$   
 $3-4=$   
 $4+(-3)=$

Having explored number sequences, I can establish the set of numbers generated by a given rule and determine a rule for a given sequence, expressing it using appropriate notation. MTH 3-13a

**Patterns & Relationships**

I can able to establish the set numbers generated by a given rule  
Eg How many .....

I am able to determine a rule for a given sequence.  
Eg 1, 3, 7, 12 ...

I am able to determine a rule within a table

Eg Posts - Bars  
2 5  
3 3  
4 4  
10

Having explored the notation and vocabulary associated with whole number powers and the advantages of writing numbers in this form, I can evaluate powers of whole numbers mentally or using technology. MTH 3-06a

### Powers & Roots

I can calculate sums with powers of 10  
 $10^1$   $10^2$   $10^3$

I can express 5000 as a whole number between 1 and 10 multiplied by a power of 10

I can use scientific notation to express number  
 $643 = 6.43 \times 10^2$

I can understand the notation and vocabulary associated with square roots, cube roots  
 $\sqrt{64}$   $\sqrt[3]{64}$

I can understand the notation and vocabulary associated with square and cubed numbers  
 $9^2$   $5^3$

I can use a calculator to evaluate  $\sqrt{19}$  to 2 decimal place

I can show how quantities that are related can be increased or decreased proportionally and apply this to solve problems in everyday contexts.  
MNU 3-08a

### Ratio & Proportion

I understand and can establish  
the ratio between related  
quantities  
Eg 20 boys : 30 girls  
= 2 : 3

I am able to apply my knowledge of ratio  
to keep the proportion the same when  
solving problems in real life situations  
Eg Cooking for large numbers  
Helpers on school trip

Having investigated a range of methods, I can accurately draw 2D shapes using appropriate mathematical instruments and methods.  
MTH 3-16a

I can draw polygons using a protractor, compass & ruler using my knowledge of interior angles  
Eg hexagon =  $360 \div 6$

### 2D & 3D Shape

I can draw equilateral and isosceles triangles using a compass and ruler

I can draw equilateral and isosceles triangles using a ruler and protractor

I can draw quadrilaterals using a ruler & protractor

Using simple time periods, I can work out how long a journey will take, the speed travelled at or distance covered, using my knowledge of the link between time, speed and distance.  
MNU 3-10a
