

Cardboard Boat – Sink or Float

You Will Need:

- Egg cartons/cardboard boxes
- Cardboard tubes
- String
- Coloured paper
- Collage material to decorate
- Tin foil

Method:

1. Use a small cardboard box for the base of the boat.
2. Glue or tape the cardboard tube into the middle as a mast. You can cut some slits in the bottom of the tube to make some tabs. This will make it easier to stick down.
3. Use the string as rigging. Cut a piece of string that fits from the mast to the sides of the boat. Stick the string on.
4. Cut two right angle triangles from the coloured paper to make sails. Glue or tape them to the string.
5. Decorate the boat with the collage material.
6. Test the boat to see if it floats.
7. If it doesn't, try adding tin foil around the cardboard base to see if it floats now.
