

## *How long and wide is each object?*

| List four objects | Estimate the length & width<br>m or cm | Measure the actual length & width | How far out were you? |
|-------------------|--|-----------------------------------|-----------------------|
| 1.                | Length<br><br>Width                    |                                   |                       |
| 2.                | Length<br><br>Width                    |                                   |                       |
| 3.                | Length<br><br>Width                    |                                   |                       |
| 4.                | Length<br><br>Width                    |                                   |                       |
