

Multiplication Tables Homework Grid

On this sheet are examples of games that can be played at home to support learning. These should be used for maths homework. Each fortnight learners will be asked to practise a different table.

Practise the times table you are working on for 5 minutes each day.

Once you can recall the times table mentally try the associated divisions.

Challenges

With the Paris Olympics approaching, we will be competing in various events, in class, to determine our Times Table Olympian every fortnight!

Tables Aloud!

Sing your times table! Searching google for times table songs will find you lots of examples.

Speed It Up!

Have a times tables speed challenge with someone at home. How many questions can you answer correctly in 30 seconds? Mix up the table so that you are answering in random order.

Skip It!

Try exercising whilst you say your times tables as you skip, hop or jog.

Look, Say, Cover, Write, Check!

Look carefully at your times table and say it to yourself. Now cover it up and try writing down as many calculations as you can. Check how many you have correct.

Cut the Cards!

This game practices all the time tables facts. Split a deck of cards between you and a partner. With your cards face down, each player picks a card and turns it face up at the same time. The first player to say the correct product of the numbers on both cards wins the cards. If you pull out a Jack, King, or Queen you may ask your partner any times table question. If they are correct, they keep the cards, if they are wrong, you keep the cards. Who can gather most cards?

Roll the Dice!

Write out all the answers to your times tables up to $\times 12$. Take two dice and roll them. Add the two numbers you roll together and multiply them by the number of the table you are learning. How quickly can you cross out all the answers?

Recite them!

This is the simplest way to practise times tables as it can be done any time and in any place – walking to school, in the car, at bedtime – simply say the times table together with a family member. (Miss McDonald remembers this way well!)

Perhaps you can think of some other ways to practice your tables which you can share with us in class.

Online Games

There are lots of websites where you can practice your times table. Sumdog and Topmarks are great to start with.
