

A QUICK GUIDE TO

EDGE BROWSER

Created by @miss_aird

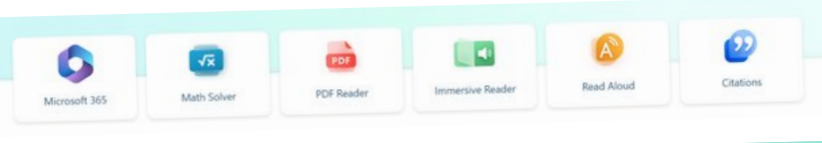

WHAT IS EDGE BROWSER?

Microsoft 365 on Microsoft Edge provides a comprehensive suite of tools that can unlock your creativity, promote teamwork, and provide a safe experience for education. With this tool, students can collaborate on projects, access shared resources, and work on assignments with ease.

LEARNING MODE

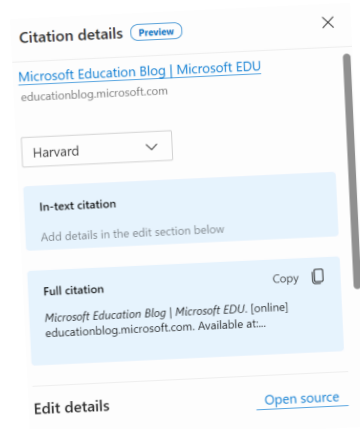

1. Launch Edge browser
2. Click on the **ellipsis** icon
3. Select **Appearance**
4. Scroll down to "Select which buttons to show on the toolbar"
5. Enable "**Learning Toolkit**", the learning toolkit button appears on the toolbar.

CITATIONS

Citations on Microsoft Edge is a tool that can generate citations for your next class project instantly. Right-click on any page and copy its citation, eliminating the need to manually create citations.

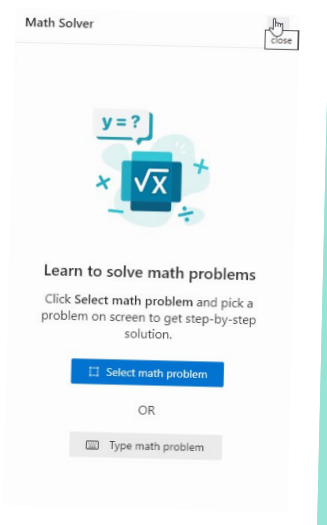

Add the citations button on edge by clicking on the **ellipsis icon** > **Select Appearance** > Scroll down to "Select which buttons to show on the toolbar" > **Enable Citations**.

MATH TOOLS

Snip any math problem from the web or PDFs and get an instant step-by-step solution.

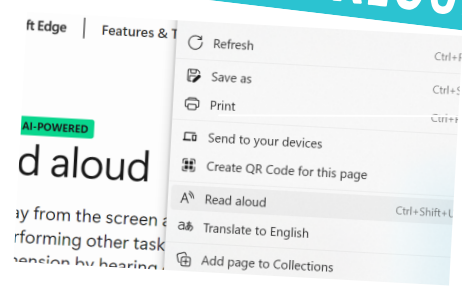

1. Launch Edge browser
2. Click on Settings and more (three-dot icon) and select **Settings**
3. Click on **Appearance**
4. Toggle the "**Show Math Solver button**"

READ ALOUD

To hear specific content, **select the text** of what you'd like to hear, then **right-click** and select **Read aloud selection**.

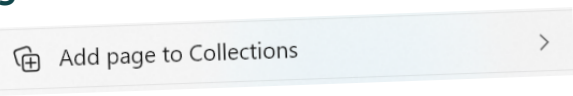

Alternatively press **Ctrl + Shift + U**

COLLECTIONS

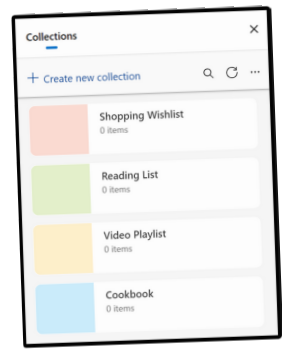

Use Collections to save learning resources like websites, images, your own notes, and more. You create one Collection for each of your learning or group them all together.

When browsing online you can add any webpage, images or links to a Collection by **right clicking** then selecting **Add page to collections**

In addition to websites and photos, you can add notes to your Collections. Just open a collection and choose the **Add note icon**.

Open your collections by pressing **ctl + shift + y**

IMMERSIVE READER

Streamline content on webpages to help you focus and absorb information online. Remove distractions and modify pages to fit your reading preferences.

Select the text you want to read, then press and hold (or right-click) and select **Open in Immersive Reader** from the context menu.

Immersive Reader removes the clutter online, such as ads and website navigation, so you can focus on your reading. You can also use **Reading preferences > Line focus** to highlight specific lines on the page as you scroll
