

TOUCH THE SPRING
WHAT TO DO

Try and touch the spring. Was that what you expected?

The spring you see through the hole looks real. You can cast its shadow with the torch by pressing the button – you can see the torchlight gliding off it.

Look from the side to see what is really happening.

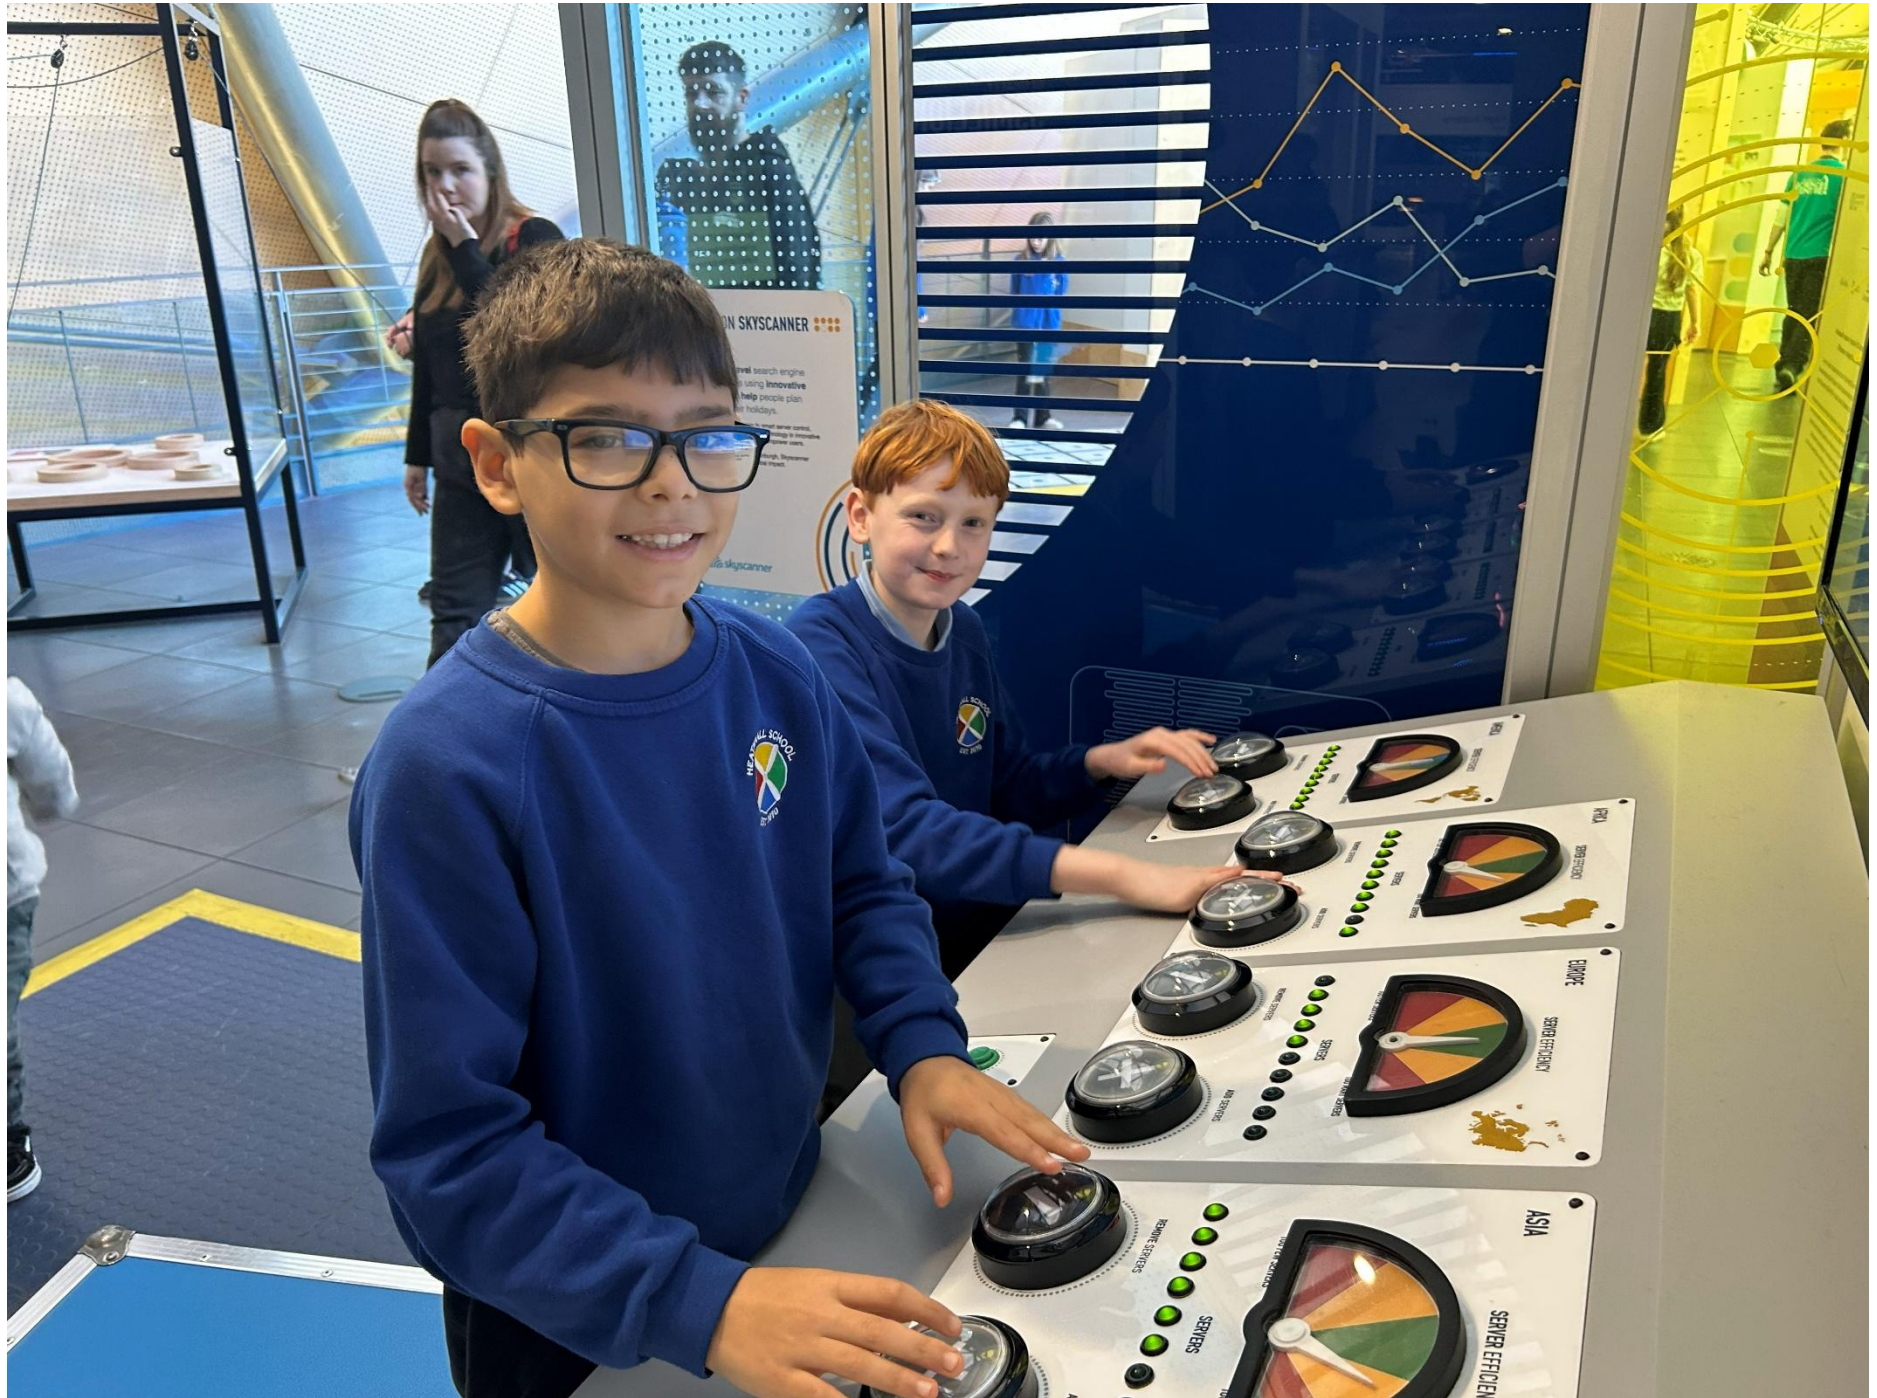

Citizen science

The power of the crowd

Become a citizen scientist and take part in real research to contribute to the breakthroughs of tomorrow.

14 LIVE BELOW WATER

Our researchers travel to investigate how climate change is affecting the marine environment.
