

## ***Planning***

Effective planning and preparation by staff to provide programmes of work that challenge and stimulate all learners and allow consistent assessment judgements will be available in class forward planning folders. These may either be hard copies or accessible online within the School Site.

Overview plans will detail the experiences and outcomes to be covered during the session for each year group, suggested resources, assessment tasks and the benchmarks that the children are working towards.

We are introducing a common planning format from August 2020 which has begun in maths for all staff at second level. From October 2020 this will be in use by staff at first and early level who will be mentored by second level staff.
