

A designer is considering what type of finish to apply to the oak table.

1. State the name of a suitable clear finish for the oak table.

2. Describe the process of finishing natural timber to make it ready for a finish.

3. State the name of the hardware shown above.

4. Describe one advantage of using these types of fittings over using traditional wood joints.

The top of the table was made from real oak.

It was fixed to the table on a base of manufactured board.

5. State the name of a suitable manufactured board

The corners of the oak table top were removed to create a 'chamfer'

6. State the name of a suitable hand tool to remove the corners.
