

Termly Overview - Term 1

Primary 7E – Mr Ewing

In term 1 P7 will be re-acquainting themselves with the most important components of numeracy; place value, adding, subtracting, multiplying and dividing. Then we'll explore rounding before looking at negative numbers later on in the term.

We've combined one of our novel studies (Divided City by Theresa Breslin) and expanded it into a whole topic that will look at religion, culture and history in the West of Scotland whilst also incorporating learning about sectarianism and prejudice from the context of the book. Our writing tasks will, for the most part, take their inspiration from this learning too. In spelling, we'll continue with our Active Literacy Programme as usual.

In PE we'll be looking at team sports and possession games; we hope to play basketball, hockey and handball during the course of the term. For Health and Well-being we'll be completing our well-being webs and looking at the importance and development of friendships.

We'll continue to develop our basic French vocabulary so that we're as prepared as possible for the move up to Grange Academy next year.

We'll be getting familiar with Chromebooks in ICT as well reconnecting with Teams, Bug Club and Sum Dog. Once that's up-and-running we'll attempt some coding towards the end of Term 1 too.

RME will look at various aspects of religions across the course of P7, starting with Islam in Term 1.
