Cautious Caterpillar Multiply and Divide

1. There are 10 spots on the ladybird's back.

   These are shared equally on each of her two wings.

   How many spots are on each of the ladybird's wings?

2. A grasshopper has 6 legs.

   How many legs would 5 grasshoppers have in total?

3. There are 14 stones near the stream.
   A frog hops on half of them.

   How many stones does the frog hop on?

4. The ladybird goes on holiday and flies 5 miles a day.

   How many miles does she fly in a week?

5. There are 10 sunflowers planted in each row.

   How many sunflowers will be in 5 rows in total?

6. It takes 45 litres of water to water the plants in the garden.
   The watering can will hold 5 litres of water.

   How many full watering cans would be needed?
