

## Primary 6/7 - Remote Learning Pack 3 Week beginning 25<sup>th</sup> January 2021

Following Feedback received after our first week of remote learning, we have adapted the weekly grid slightly. We have organised on activities which can be completed on different days throughout the week if you wish. We understand this will not be suitable for everyone, so you do not have to stick to these days, you can work on them at your own pace and time throughout the week. We are flexible when work is completed and returned for marking!

We have also put stars beside activities. This is to help with prioritising tasks. Perhaps start with the \*\*\* tasks and move to the \*\* and \* if you can!

Priority key tasks to complete and return.

Tasks we would like to be completed and returned.

Optional tasks if you have completed all other tasks and are able to do more.

This week is a whole school 'Science' theme!

As always, get in touch if you are having any problems, either through email or message us on the Class Team.
