## P2 Class Newsletter

### Mrs Morrison/Mrs Hamilton

### March

We had a quick and exciting February in Primary 2! We spent lots of time learning our Scottish poem in January and a few of us got to show off our hard work at the Scottish assembly! As well as supporting our local football club and getting to meet a few of the players!

Well done Primary 2!

#### Literacy

Throughout February we have learned how to visualise and describe settings and characters, using description bubbles.

We will now begin to explore non-fiction writing through our growth and life cycle topic, as well as our Scottish Inventors topic.

#### Learning across the Curriculum

We have spent time learning and exploring exciting Scottish inventions which have shaped our world. Including the discovery of penicillin, the invention of the telephone and the television.

We have chosen to explore the growth and life cycle of frogs for our topic, because we found some frogspawn in the playground one day!

#### Numeracy

After finishing our exploration of money, we have spent time learning all about column addition and subtraction and will be moving onto multiplication and division.

Mrs Hamilton has been exploring measure with the class!

Calculating the area of a shape

Conducting a mould experiment!

Us and the Darvel football players!
