Dear Parents/ Carers,

Mr McLaughlin and Mrs McCreadie are starting an after school class in which children from P4-7 will bring along their parents to show off their computing talents. These classes will include skills such as 3D design and 3D printing, new Microsoft Office apps and the use of Glow. It will run for 5 weeks from 28th February – 28th March, with a different focus every week.

This is not only an opportunity for the children to share their learning with you, but it will also give you the chance to get to grips with the some of the technology that your children are using on a daily basis.

The use of ICT is becoming more widespread in education, and as our school moves toward the setting of homework tasks online (such as Bug Club and Glow) we would like to invite you in, along with your children, to become familiar with the some of the applications they'll be using to access this.

The classes will run from 3:15pm-4:15pm every Wednesday from the 28th February until the Spring holiday. If this is something that interests you, please send the attached slip back as places will be given on a first-come-first-served basis. As this is an opportunity for some quality one-to-one learning with your child, can we request that younger children do not attend alongside? We will have no childcare facilities and we want to make sure that those who attend get the most out of this new way of learning.

Hope to hear from you soon,

M. McLaughlin and J. McCreadie

I would like to attend the ICT after school class with my child _____ in Primary ___.

Adult name: _____
