

Are you in your 3rd or 4th year and looking for real world work experience? Join BAE Systems Naval Ships team for a one week virtual placement and earn a Silver Industrial Cadet Award.

Who are we?

We design and build a full range of naval ships from offshore patrol vessels through to giant aircraft carriers, giving customers the capability to fulfil extensive naval operations around the world.

What can I expect?

On this one week programme you will join students from across schools to develop your skills and experience through virtual live sessions and online activities devised and delivered by our apprentices and engineers. You will work on an individual project and spend time with our people who are designing and building the next generation of ships for the Royal Navy.

BAE Systems work experience is accredited by the Engineering Development Trust and on successful completion you will be awarded a Silver Industrial Cadet Accreditation

Each day starts at 10am and finishes at 3pm.
