

ENVIRONMENTAL SCIENCE

Study Techniques

What do you need to know?

Environmental Science is split into three units. You will be assessed on your understanding, how you apply your knowledge, practical skills and your data handling skills.

Study Cards

Environmental Science is full of terms and definitions, so the best way to learn this information is by using study cards. Pre-cut cards and rings are available in the department. Use your glossaries to help create these.

Mind Maps

Mind maps are useful to split difficult processes. By chunking the process or topic, you will be able to focus on smaller pieces at a time. This will give you time to digest the knowledge.

Past Paper Questions

All past paper questions can be found using the hyperlinks on SharePoint or by searching the SQA website. This will allow you to focus on one key area at a time. Past paper questions are the best way to practice applying your knowledge.

GRANGE ACADEMY SCIENCE DEPARTMENT

Resources

All resources for Environmental Science can be found on SharePoint. This includes PowerPoint lessons that you'll see in class, summary notes, case study examples, home learning exercises and practice questions.

Online Resources

Websites such as Quizlet, Understanding Standards and SQA are all hyperlinked on SharePoint. You will need to log in using your Glow account details.

Supported Study

Day	Time	Room	Level
Fri	08.00 -8.35	S014	Higher

Study Café is available on Thursdays, in the library, 15.35 -16.35, to study any subject.

Speak to a Teacher

You do not need to wait for supported study to ask for help. Speak to **any** subject teacher if you need help or support with Environmental Science.
