

Primary 6/7 Newsletter

Hello. Term 2 promises to be an exciting and memorable term for our learners. Parts will be cast, songs performed, dances choreographed and technical knowhow challenged as the school show looms into view. We will also be finishing our board game designs and contacting leading game developers for their insight and opinion as well as inviting parents in to try them out and watch our Class Assembly.

Literacy: Charlie and the Chocolate Factory will finish soon and our next novel, the WW2 set Carrie's war will be started ready for Term 3. Speaking and Listening take centre stage this term with presentations, adverts, drama and assemblies all to be delivered. Writing will involve letter creation and persuasive texts including advertising.

Numeracy: We have started Term 2 looking at measuring Perimeter and Area before returning to number and how to multiply and divide numbers including decimals. We will also be investigating 2D and 3D shape as well as net construction—as our games need boxes!

Expressive Arts: will be looking at a range of media and digital media to create their games, boxes and instruction cards being mindful of themes and colour motifs to inform their design.

STEM: We will use a range of STEM disciplines to research chosen companies as well as create sales pitches using PowerPoint or Sway. We will also be using digital media to film and edit our adverts. Construction of our games and boxes will also call on a range of STEM skills. Mrs. Granger will deliver science this term looking at Electrical Forces.

PE: After our fitness topic where we are all now stronger and faster with better stamina, we now look to both gymnastics and possession games with a focus on netball.

Term 1 homework engagement was lower than expected so we are now switching to a tally system. It is still available on the school blog or can be printed off. All work should be completed in Homework jotters. PE days are Wednesday and Friday and a change of clothing is expected as it promotes good hygiene and is good preparation for S1.
