

Primary 2/3 Newsletter

August 2026

Welcome

P2/3 and Miss McGregor are so excited for the new school year! We have been busy setting routines and baseline learning ready for the year ahead.

IDL

Following the children's interest in the solar eclipse we will be looking at the Sun, Moon and Stars. We will learn about day and night, how the Sun and Moon appear to move across the sky and observe the world around us!

Mathematics

- In Numeracy we are developing our number sense and reminding ourselves of addition and subtraction through number of the day activities and concrete materials!
- Our Home corner has quickly become a restaurant, we will be extending this idea by exploring money in real life concepts!

Helping at Home

Giglet and Sumdog passwords will be sent home soon.

As we focus on money, seeing grown-ups handle cash is very beneficial. Please encourage your learner to count coppers, and check prices in the shops!

As you read with your child, try to ask questions to develop understanding.

HWB and PE

PE days are Tuesday and Thursday with fitness on a Monday. We are working on our ball skills and team games!

In HWB we have been learning that all emotions are ok and how we can manage them!

Literacy

- We are currently revising sounds learned last session and are beginning to expand our vocabulary. We will use these skills to develop our reading and writing this term!
- We are reading a story book in the classroom after lunch everyday, please ask what we have read today!

Thanks: P2/3
