William McIlvanney Campus — Update

Welcome to the 6th issue of our community Newsletter for William McIlvanney Campus, Kilmarnock.

We are now in week number 61 of a 108 week build programme and we are still on programme to hand over in March 2018.

We are well underway with internal fit out on all floors—with erection of partitions & installation of mechanical & electrical services.

Envelope as can be seen is progressing well with the brickwork now ongoing.

We will be commencing the new bus turning circle at the existing school over the summer holiday and will have it complete prior to the school returning.

We recently took part in the 2020 Challenge Starting at the most northerly Kier site on Orkney the challenge is to join up each business on the green relay route that takes in all Kier offices and as many sites as possible. The journey has to be completed in 2020 hours and must finish at the most southerly site in Cornwall.:-

12 of the Project Team travelled to Peebles from our Project on Bikes and endured some tricky weather along the way and had great fun.

A truly Magnificent Challenge + Well Done to everyone taking part and participating.

We also collected over 60 Easter Eggs for New Farm Nursery which was well received Lots of Happy Faces. We continue to collect for the Food Bank collected on our Project to the local community which is always well received and thank you to everyone's donations.

We recently welcomed 60 Visitors to our Open Doors Event 2017 which was a great experience for all the Local schools / Ayrshire College / Community and Public

Through organising these CSR events on site we have raised over £1314.00 to date.

We value your feedback and comments or questions on this project, please email: Kilmarnock@kier.co.uk
