

These are our results:

Size of parachute						
Time taken to reach the ground	1st					
	2nd					
	3rd					

Our results showed us that the fastest parachute to fall was parachute _____
We think this happened because

Picture to show investigation

GRAVITY AND AIR RESISTANCE

What size parachute
will fall the fastest?

We are going to test the time it takes different sized parachutes to fall to the ground because

We are going to measure the time each parachute takes to land by

The one thing we will change is:

These are the things we will keep the same:

We think the parachute with _____

_____ will take the longest to fall because

This is what we are going to do:

- Firstly _____
- Then _____

- Next we will _____

- To finish we will _____
