

Each player starts with 15 points.

Player one flips a card (remove face cards or assign them point values

first). If the card is black, they add it to their total. If it's red, they subtract it. Highest point total when all the cards are gone wins!

How to play Plus 1 Minus 1

To play the game, remove all the kings, queens, jacks, and jokers from the deck. Shuffle the cards and lay the pile face down.

This game can be played by one or two kids.

Decide ahead of time whether you will be playing Plus 1 or Minus 1.

Each player takes turns flipping over the top card on the deck and quickly adding 1 to that number (for Plus 1) or subtracting 1 (for Minus 1). If they answer correctly, they can keep the card. Simple, right?
