
Converting Improper Fractions to Mixed Numbers

1) $\frac{11}{4} = \underline{\quad}$

2) $\frac{53}{8} = \underline{\quad}$

3) $\frac{27}{6} = \underline{\quad}$

4) $\frac{13}{2} = \underline{\quad}$

5) $\frac{39}{7} = \underline{\quad}$

6) $\frac{24}{5} = \underline{\quad}$

7) $\frac{66}{9} = \underline{\quad}$

8) $\frac{42}{8} = \underline{\quad}$

9) $\frac{19}{4} = \underline{\quad}$

10) $\frac{53}{10} = \underline{\quad}$

11) $\frac{18}{7} = \underline{\quad}$

12) $\frac{5}{2} = \underline{\quad}$

13) $\frac{74}{10} = \underline{\quad}$

14) $\frac{26}{5} = \underline{\quad}$

15) $\frac{17}{3} = \underline{\quad}$

Converting Mixed Numbers to Improper Fractions

1) $9\frac{1}{3} = \underline{\quad}$

2) $3\frac{7}{8} = \underline{\quad}$

3) $4\frac{3}{10} = \underline{\quad}$

4) $8\frac{3}{5} = \underline{\quad}$

5) $8\frac{1}{2} = \underline{\quad}$

6) $3\frac{2}{9} = \underline{\quad}$

7) $2\frac{1}{7} = \underline{\quad}$

8) $3\frac{3}{4} = \underline{\quad}$

9) $8\frac{1}{2} = \underline{\quad}$

10) $7\frac{1}{2} = \underline{\quad}$

11) $6\frac{1}{4} = \underline{\quad}$

12) $2\frac{4}{5} = \underline{\quad}$

13) $9\frac{1}{4} = \underline{\quad}$

14) $6\frac{1}{3} = \underline{\quad}$

15) $4\frac{7}{9} = \underline{\quad}$
