

# The Body Homework Challenge

## Learning Intentions

- Develop research skills, and find information from a range of sources
- Display information in an appropriate way

## Success Criteria

- Use the internet/books to find information about a part of the body
- Produce a model/poster to display information

Primary 5/6 have been studying “The Body” as a class topic. We have been learning all about the human body and how it works.

Your challenge is to:

- 1) Research a part of the body, using the internet and/or books
- 2) Create either a model or a large poster (or both!) to display the information you find out

Examples of body parts to research include the heart, lungs, brain, eyes, ears, liver or kidneys.

You should include information about the function of the body part, how it works and why it is an important part of the body. Any other fun or interesting facts can also be included!

If you choose to create a model, you can use any materials you think might be useful, such as cardboard or play dough. If you need any materials, please ask your teacher.

Please bring in your completed homework by **Monday 7<sup>th</sup> June 2021**.

All models and posters will be presented in class.

**Good luck and have fun!**
