Today we are going to be learning how to identify numbers halfway between whole numbers on a number line e.g. 1 ½, 2 ½ etc.

If the number line continued what fraction would be half way between 2 and 3?

Yes 2 ½

If you use your ruler this can help to look at halves in higher numbers.

Do you know what fraction the arrows are pointing to?

Blue -

Orange -

Purple –

Now go back to the blog and you will find your task for today.
