

What is a tenth?

A tenth is a shape, quantity or set of objects which are split into 10 **equal** parts/groups. Each part is called **one tenth**. There are **10 tenths** in one whole.

Which of the images did you think were the odd ones out?

This shape is split into 8 equal parts - not 10.

This shape is split into 9 parts and each part is not equal. They are all different shapes and sizes.
