

## My Invention

Directions: You are a scientist or an inventor. You have decided that you want to invent something that will benefit society. Your invention must be realistic or useful or help others.

### Ideas:

**Home improvement:** Something that will make your home a better place to live or solve day to day problems you have at home.

**Conservation:** Something that will help conserve resources that could be wasted such as water, electricity etc.

**Alternative energy:** Instead of wasting things we could transfer them into resources for energy.

**Entertainment:** Something that will make life more enjoyable or make life more fun.

**Helping Hands:** Something that will help people who may have disabilities and have a hard time doing day to day activities.

1. Research Inventions.
2. Write a detailed description, explaining what it is, materials you need to make it, who it is for, how it will be used and how it will benefit people.
3. Draw and label your design. Make it very detailed.
4. Make your design if you can. (only if you have the materials at home)
5. Have fun.
