- have patience.

What Roles and Responsibilities Do Nurses Have?

Like doctors, nurses also treat and care for their patients. They help lots of people - from the ones who have cuts and other small injuries, to some who are very sick for a long, long time. They help their patients get better by using care plans, doing tests and giving medicine to help people to become healthy again. People usually see nurses in doctors' clinics by making appointments, but nurses also work in hospital wards and emergency departments. Nurses are very busy and do lots of different jobs like give shots, change bandages, check on the patients, clean cuts, take blood pressure, write notes and get people ready for operations. Nurses in hospitals can care for the same patients a lot - they talk with them and their families so they get to know the patients very well.

Where Can Nurses Work?

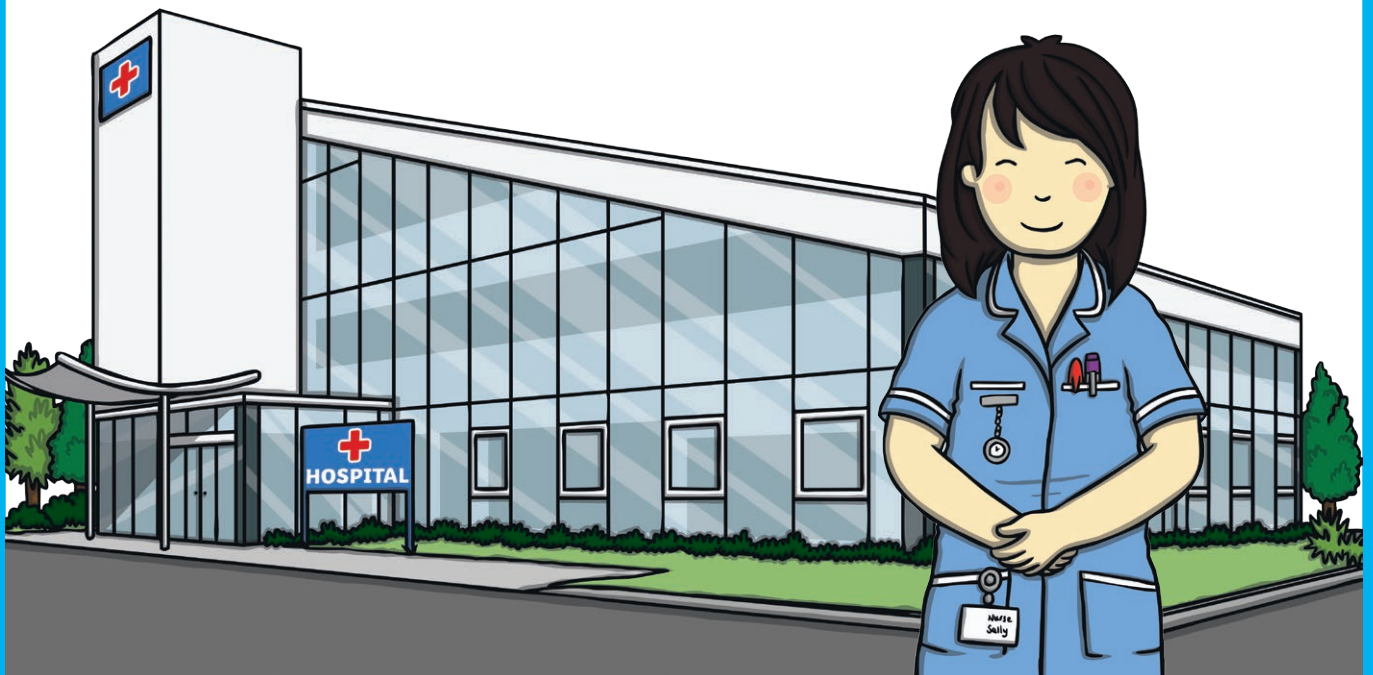

They can work in surgeries, hospitals, clinics, navy, army and air force bases, prisons, homes, schools and other places, in our country and abroad.

What Do Nurses Wear and Need?

Nurses usually wear a uniform. This could be scrubs, a white dress or a blue coat and dark pants. Nurses need needles, gloves, bandages, swabs, tweezers, scissors, notepads, pens, pencils, clipboards, thermometers, medicines and lots of other medical equipment.

How Do You Become a Nurse?

To become a nurse, you have to have a high school diploma and then go to college or a university to complete a nurse training program.
