

# Teacher notes

Children will match the partitioned numbers to the correct number. Children may use concrete apparatus to help them. Once matched, they will draw a part-whole diagram to represent this. Template – Part-whole models can be used.

## DEVELOPING

Children will match the number to its partitioned form where the second addend is one digit only.

## SECURE

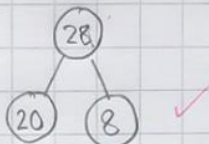

Children will match the number to its partitioned form where the second addend is up to two digits.

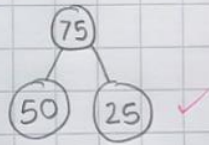

## MASTERY

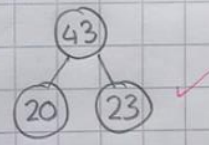

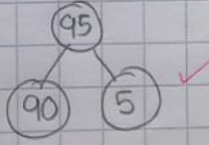

Children will match the number to its partitioned form where all second addends are two digits.

Example:

1)  $20 + 8 = 28$  ✓ 

2)  $50 + 25 = 75$  ✓ 

3)  $20 + 23 = 43$  ✓ 

4)  $90 + 5 = 95$  ✓ 

32	87	22
71	56	91
46	82	64
34	95	28
43	39	75

$60 + 4$	$90 + 1$	$80 + 7$
$20 + 2$	$70 + 5$	$20 + 8$
$90 + 5$	$40 + 3$	$70 + 1$
$30 + 9$	$30 + 2$	$40 + 6$
$50 + 6$	$80 + 2$	$30 + 4$

32	87	22
71	56	91
46	82	64
34	95	28
43	39	75

$50 + 14$	$80 + 11$	$80 + 7$
$10 + 12$	$50 + 25$	$20 + 8$
$90 + 5$	$20 + 23$	$30 + 41$
$20 + 19$	$30 + 2$	$40 + 6$
$30 + 26$	$50 + 32$	$10 + 24$
