

Fact Family Houses

Build your own multiplication and division fact family houses.

A house-shaped template with three circles in the triangular roof. The rectangular body contains four rows of math problems, each with three empty boxes for numbers and a central operator. The first two rows are for multiplication, and the last two are for division.

$$\square \times \square = \square$$
$$\square \times \square = \square$$
$$\square \div \square = \square$$
$$\square \div \square = \square$$
