

P1/2 Numeracy Monday

Introducing parts and wholes

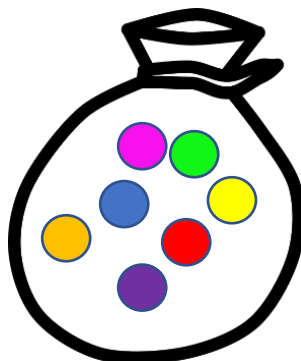

To help with this activity you may find it useful to use concrete materials, such as pennies, marbles, toy cars, buttons or anything else you have at home. 😊

1. Here is a bag of marbles. How many marbles are in the bag?

Can you make 2 groups? Is there more than one way to group the marbles?

2. Here is an even larger bag of marbles, how many marbles do we have?

Can you make two groups with these marbles? How many different ways can you find?
