

P1/2 Numeracy Wednesday

Part-whole models (1)

To help with this activity you may find it useful to use concrete materials, such as pennies, marbles, toy cars, buttons or anything else you have at home. 😊

1. Here is a part-whole model showing a group of buttons. How many buttons are in the whole? Can you complete the part-whole model? Group the buttons by colour.

2. Here is a part-whole model. We know the parts; can you work out how many marbles are in the whole?
