

P1/2 numeracy Thursday

L.I: I can make systematic number bonds.

1. Can you work out the missing number bond from this set?

$$7 + 0$$

$$6 + 1$$

+

$$4 + 3$$

$$3 + 4$$

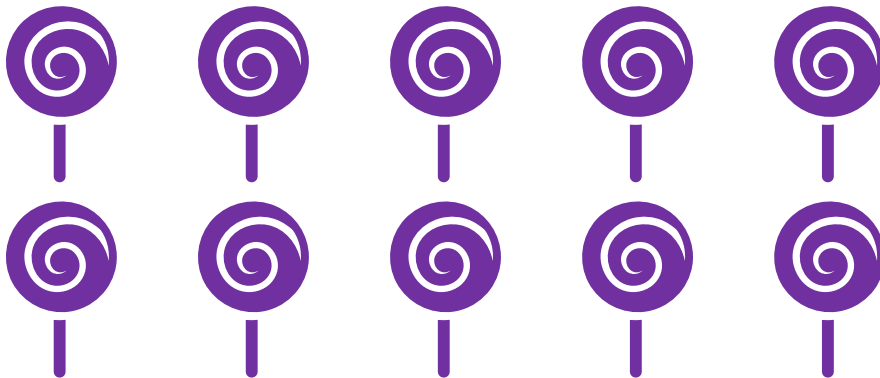

$$2 + 5$$

$$+$$

$$0 + 7$$

2. Can you find all of the number bonds for 8? Use a systematic approach. 😊

3. There are 10 lollipops.

If I give 4 to my friend, how many will I have left? Draw a circle around the 4 I am giving away, that will help you to see how many are left.
