

## Ancient temple of massacre by Jake

Once upon a time next to the abandoned rusted, disgusting 'TEMPLE OF MASSACURE' there was a group of investigators. They wanted to enter the temple of massacre, so they did. As they entered, they could see two golden statues. All the golden statues were holding massive axes they were the sun god Ra. The team continued the place was so dusty. They found a stone tomb which was rocky and very dirty. You could hear something hissing I wonder what that could be. The stone tomb was very old; there were rats and bats.

There was a rusted door covered with metal chains and one of my crew members spotted a piece of paper. I read and it said something about a gem. I got my pliers and started cutting the chain lock on the chain. It didn't work so we saw a lever and pulled it that worked! As the creaky door started opening it was so screechy. I don't think it was opened in ages maybe even centuries.

When the door opened, we spotted something glowing. When I touched the paintings, they just shattered and disintegrated, and we saw a GEM!! It was beautiful, one of

my crew members touched it. We were all shouting at him because it could be dangerous. However, he still touched the glorious gem and BOOM, the room burst into flames and there were snakes. The snakes swooped the crew member that touched the gem away along with 3 others. I saw a snake coming at me. I hid behind the gem. The snakes tried to get me coming from the other side of the gem. So, I went through the opposite side and me, and 1 other member made it out.
