What about Greece?

Greece is located at the southeast end of Europe and it is the southernmost country of the Balkan Peninsula. Greece is also located between several countries and seas.

Greece was inhabited as early as the Paleolithic period and by 3000 BC had become home, in the Cycladic Islands, to a culture whose art remains among the most evocative in world history.

Greece adopted the euro as its currency in January 2002. The adoption of the euro provided Greece with access to competitive loan rates and also to low rates of the Eurobond market. This led to a dramatic increase in consumer spending, which gave a significant boost to economic growth.

Greece is a parliamentary republic and last amended its constitution in May 2008. There are three branches of government.
