

As part of our commitment to sustainability and reducing the cost of the school day are looking at a range of ways to achieve this. We discuss the three 'R's in school often – reduce, reuse and recycle. By reusing items required for the school day, we can all do our bit to help the planet.

We are collecting

- School uniforms that your children have outgrown
- Schools bags that are no longer required
- Gym Kit that your children have outgrown

We will make these available for other families to use.

**Please ensure that any items are clean
and in a reusable condition.**

We will make items available for collection prior to the end of the final term. We would then hope to be able to have a preloved uniform rail within the school which can be accessed for additional items throughout the school year.

We will collect items after the Easter Holidays.

We are also looking for a clothes rail. If you can help us out with one, please contact the school.
