## 3D Shape Challenge

Challenge: Using your knowledge and understanding of 2D and 3D shapes, I would like you to design and create a 3D shape junk model. Use 2D shapes to help you decorate your chosen model. Each day this week, you will be asked to complete a task that will help you complete your junk model using 2D and 3D Shapes.

Task 1:

Today's task is to have a think about what junk model you would like to design and create using 2D/3D shapes. Think about the size of your model and what materials you will need to gather in order to make your junk model. For example, an empty cereal box for a robot's body. Draw in the box below what your model is going to look like and in the other box write a list of all the resources you will need to complete this task.

Junk Model Design
