

DYSLEXIA

Adam

AND

Lauren

About Dyslexia

- Dyslexia doesn't mean we aren't clever.
- It's not a disease either.
- Dyslexia is a difficulty in learning to read, spell and write. Dyslexia can also make learning tables and telling the time difficult and parts of the spoken language challenging.

More Information

- Dyslexia can make learning and communicating with others more difficult, but there is lots of help available to overcome difficulties.
- Those who experience dyslexia often share common strengths.

Strengths that people with Dyslexia have

- Being very creative and enjoying practical tasks.
- Strong visual thinking skills for example see and think in 3D.
- Good verbal skills.
- Good at problem solving.
- Dyslexia can affect anyone and is different for everyone. It is not a disability, it is a difference in the way you learn.
- All of these describe us and are Dyslexia.

Dyslexia Support

- If you think you or someone you know may be Dyslexic, speak to someone you can trust in your family or a teacher at school.
- Your school will be able to help, you are entitled to help so make sure you get the support you should.
- Support to deal with Dyslexia will continue in further and higher education and in the workplace

Things it does to us

- When we read a book or some thing else the letters and words muddle up and its harder to read.
- How some people see it how dyslexic people see it see it

We all see things the same way. We see words in groups or phrases. The print is more dominant than the background. The print shows no movement. The printed letters are evenly black. Black print on white paper gives the best contrast for everyone. White background looks white.

- We use Alphasarts for writing and they help with spelling and presentation of work
- We can take our Alphasarts home to do our homework
- Laptops for spelling games to help us with spelling
- Tinted glasses sometimes help people to read
- Table and number squares to help us with maths
- Extra time for assessments

Famous people with dyslexia

- Jamie Oliver
- Orlando Bloom
- Tom Cruise
- Robbie Williams
- Muhammad Ali
- Guy Ritchie
- Richard Branson
- Steve Redgrave
- Albert Einstein
- Walt Disney
- Will Smith

Orlando B

Albert E

Quiz !!!!!

- How does it affect us?
- Dyslexia can make learning to read, spell and write difficult. Also communicating with others more difficult
- What do we use to help us?
- Alphasmart's computers and glasses
- Does dyslexia mean we aren't clever?
- No
- Is Dyslexia a illness?
- No
- Name a few famous people

any questions
