STEAM IN ST. LUKE'S

Construction visit to Maidenhill Primary

DYW West along with BAM construction have granted access to a number of our S4 pupils to the new Maidenhill primary school in East Renfrewshire. A group of S4 boys have been working with BAM construction finding out more about some of the construction jobs and courses available to them on offer for when they leave school.

Young WEIR-WISE: Discovering Engineering with S2 Girls outreach programme

Congratulations to Nichola Spence and Katie Dunne who were successful with their application to the Strathclyde University S2 engineering outreach programme. Both pupils will take part in a two-day programme which will run at the University of Strathclyde in January 2019. There are 100 places available, all of which are fully-funded by the Weir Group. Well done to both girls for securing a funded place on the programme.

Drama set and costume workshop

On the 2nd November Higher Drama pupils took part in a set and costume design workshop with Debbie Montgomery from The Tron theatre and Gilly Slater a set designer. Pupils created their own mood boards and worked on the process a designer goes through to create and present a design. All the pupils worked in groups to design and create miniature pieces of set for a model box.
