

BEng

Engineering Academy

University of
Strathclyde
Engineering

**An alternative route into Engineering
at the University of Strathclyde**

What is the Engineering Academy?

The Engineering Academy offers you an alternative route into an Engineering degree at the University of Strathclyde. The first year is an enhanced HNC programme which is taught at one of seven partner colleges and allows direct transfer into a variety of degree programmes in the following departments here at the University of Strathclyde:

- Biomedical Engineering*
- Chemical & Process Engineering
- Civil & Environmental Engineering
- Design, Manufacture & Engineering Management
- Electronic & Electrical Engineering
- Mechanical & Aerospace Engineering
- Naval Architecture, Ocean & Marine Engineering

Entry Requirements:

We typically ask for four Highers at BBBB which must include Maths and Physics. For entry to Chemical Engineering, Higher Chemistry is also required and for entry to Biomedical Engineering, Higher Biology or Human Biology is also required.

We want to increase opportunities for people from every background and we select based on merit, potential and ability to succeed. Certain applicants may be eligible for a lower offer and our minimum entry requirements are BBCC.

Please search 'widening access' at www.strath.ac.uk for more information.

What made you decide to apply to the Engineering Academy?

There were so many options and opportunities that were provided with the academy that I couldn't pass up.

Do you think your year in the college helped prepare you for joining University?

I absolutely believe that by going to college as my first year prepared me for the increased workload and deadlines. The transition from high school to university would have been difficult however, by going through college first I was able to understand and begin to work towards the demands that were expected of a student at University.

What do you think the main benefit of the Engineering Academy has been for you?

The support provided by the Engineering Academy is incredible. They have helped me strengthen my CV, increased my confidence and helped me gain the industrial experience that I have today.

What are your plans after graduation?

I have been offered a graduate role at Lenovo as a Global Supply Chain Engineer. This would not have been possible without my knowledge and experience gained throughout my placement during my time at university.

HOW TO APPLY

Applications for the Engineering Academy are made via UCAS. The UCAS admissions code is oBRT. There is no need for you to complete a separate application for the HNC programme delivered within the college.
