

East Renfrewshire Council: Education Department Practitioner Moderation Template

Prior to the moderation exercise, please complete the following information and submit it to your facilitator with assessment evidence from one learner that you judge to have successfully attained the Es' and Os'.

Experiences and Outcomes:

3-08a.

Learning Intentions:

To write a report on a proposed development in Loch Lomond.

Success Criteria:

- Use terms Social, economic & environmental
- Discuss positive / negative.

Briefly outline the context and range of quality learning experiences that have been provided making reference to the chosen design principles.

- Watch video on Trump development as Stimulus.
- Information pack provided and groups complete notes on impacts. ~~General report~~.
- Discuss possible solutions. Ranking task
Card Sort
- Take personal notes on template.
- One period to write up a report.

Record the range of assessment evidence that was gathered to meet the success criteria (Say, Write, Make, and Do) considering breadth, challenge and application.

Report

Jotter, Work

Feedback to group + class discussion

Briefly outline the oral/written feedback given to the pupil on progress and next steps, referring to the learning intention and success criteria.

Each pupil spoken to about progress / next

Steps

Pupil Voice:

What have you learned? How did you learn? What skills have you developed?

Did the learner successfully attain the outcomes? YES/NO

Excellent
work.

~~Report~~ Report

Should Funland in Balloch, Loch Lomond, be built?

Introduction - Funland's Development:

Funland includes theme parks for families and all age groups, 450 bedrooms, 70 glamping pods, shops, 100 staff rooms, a spa and a one hundred metre viewing tower. It is located in Balloch and will create 400 jobs. It will cost 30 million pounds to build and covers 32 hectares of land. There will be 1200 jobs available while the development is being built.

Excellent
✓

Positive Impacts of the Development:

The positive impacts of Funland being built are there will be 400 jobs created which will be good for local people this would be social and economic. The aquarium and shops could get more money from the tourists coming in. This would be an economic impact. You can get the train from Glasgow to Balloch which will create less traffic, this would be an economic, environmental and social impact. There will be more families staying in the area which will help local nurseries, schools and churches stay open. This would be a social impact.

Negative Impacts of the Development:

The negative impacts of Funland being built are the jobs created are only temporary which means people can only work when Funland is open. This would be a social and economic impact. There will be increased waste and need

for sewage disposal which will affect the environment there for this will have an economic and environmental issue on the land. The wildlife in the area will be destroyed which will ruin the natural landscape. This will be an environmental impact. The development could cause traffic congestions which will be social and environmental issues. The other attractions like the aquarium and shops could loose business which would be a social and economic impact. Since the development will take up a lot of space some of the local peoples houses will have to be knocked down which would have an social and environmental impact on the towns landscape. The local house prices will also have to rise which would mean some people will not be able to afford houses. This would have a social and economic impact. Trees and nice parks will also have to be taken away which would also ruin the natural landscape and would leave social and economic impacts.

Solutions/suggestions as to how the impacts could be managed

They could do many things to sort these problems like by creating new habitats around the area or pay money to protect other areas. This would be quite hard to do but if they did it would make a big difference. They could also pay compensation to local people who lost their homes or had to move. This would help as it was their fault they had to move house.

Report

Conclusion

I do not think that the development is sustainable - it should never have been built.

NOT -

The reasons I have come to this decision are:

I have said this because there are lots of environmental issues for the development which makes it unsustainable. I have also found many more negative issues than positive.

The Funland development is not sustainable because:

It is not sustainable because there are big environmental, economic and social issues that affect money, people and the environment like taking away nice landscapes, big traffic congestions, houses knocked down these are all big issues that affect people's lives just for a theme park and hotel to be built there for the development is not sustainable.

Solutions/Suggestions as to how the impacts of the development could be managed:
(Only required for 3rd Level and 4th Level)

- Create new habitats around the proposed area or pay money to protect other areas.
- pay compensation to local people who lost their homes or had to move.
- Give attractions and hotel discounts to local people.

Conclusion - my research has shown that:

- The development is sustainable - it was the correct decision to build it.
- The development is not sustainable - it should never have been built.

The reasons I have come to this decision are:

(Required for 2nd and 3rd Level)

I have said this because there are lots of environmental issues for this which makes it unsustainable. I have also found many more negative issues than positive.

The FunLand Development is/is not sustainable because:

(Required for 4th Level - you must demonstrate that you understand the concept of sustainability)

Fun Land is not sustainable because there are big issues that affect people and the environment like: • Taking away nice landscapes • Big traffic congestions • Houses knocked down. These issues are a big problem as they affect big things

Should FunLand in Balloch, Loch Lomond, be built?
Is it an example of a Sustainable Tourist Development?

Introduction - Funland's Development includes:

(Required for 2nd, 3rd and 4th Level) • 1200 jobs created.

- covers 32 hectares of land.
- family theme parks.
- 450 bedrooms
- 70 glamping pods
- Hostel
- Shops, rides
- 100 staff rooms
- local road developments
- spa
- £30,000,000 30 million
- In Balloch
- 100m viewing tower
- 400 jobs

Positive (Good) Impacts of the Development

(For 3rd Level and 4th Level you must make it clear whether the impacts are Social, Economic or Environmental)

- 1,200 jobs created (social, economic)
- The aquarium and shops could get more money. (economic)
- attracts tourists and businesses. (economic)
- You can get the train from Glasgow (economic) (environmental)
- Families will stay so that nurseries and schools will stay open. (social)

Negative (Bad) Impacts of the Development

(For 3rd Level and 4th Level you must make it clear whether the impacts are Social, Economic or Environmental)

- Jobs created are only temporary. (social)
- Increased waste and need for sewage disposal (economic) (environmental)
- Wildlife will be destroyed (environmental) (social)
- Takes up 32 hectares of land (social) (environmental)
- Traffic congestion (social) (environmental)
- The other attractions could lose business (social) (economic)
- There is lots of housing that will need to be knocked down. (social) (environmental)
- The local house prices will have to be put up. (social) (economic)
- Trees and nice parks have to be taken away. (social) (environmental)
