

Dyslexia: Did you know...?

Dyslexia Awareness Week 7-12 November 2016

1 in 10 people has dyslexia and it often runs in the family.

Dyslexia can cause difficulties with reading, writing and spelling.

Other challenges can include poor short-term memory, organisational and processing skills.

There is no 'cure' for dyslexia but with the right support, people can reach their full potential in work, education and life.

Strengths of People with Dyslexia

Problem solving skills

Ability to think 'outside the box' and see the 'bigger picture'

Good spatial awareness

Empathy and resilience

Creativity

Strong visual thinkers
